EL CERRITO GAS WAR ON

'ROUND 'N' 'ROUND

The Richmond American Legion football team got a successful season start Sunday when they defeated an Oakland team 6 to 0 at a local gridiron.

* * * *

The members of the team deserve all the credit that they are being given.

* * * *

Every boy or man on the team is playing the game, not for his dear old college, not because he is given such an offer that it is worth his while, but because he loves the game.

* * * *

The world's worst joke was told by a certain columnist the other day in his daily task.

* * * *

Evidently he used it to fill up space, too.

* * * *

It seems that a certain king had sentenced his jester to be executed because of the terrible puns he was making.

* * * *

The night before the jester was to be led to the gallows, the king's messenger arrived to see the prisoner.

* * * *

"Jester," he said, "the king has pardoned you . . . on the condition that you never again make another pun. You have escaped the noose."

* * * *

The jester sighed a breath of relief and remarked, "Well no noose is good noose."

* * * *

They hanged the jester the next day.

* * * *

Richmond should have a record month for building, according to reports from the city building inspectors' office.

* * * *

It is indeed unfortunate that these large industries that are locating in this city do not need a building permit.

* * * *

If they needed one, Richmond would have a record year, when one considers that huge Ford plant, the cannery and other big buildings here.

* * * *

Cities are judged by the number of building permits issued.

BANDIT ROBS AUTO STAGES

PORTLAND, Sept. 29. —UP— Thirty-two passengers, 15 on a northbound North Coast stage and 17 on a southbound International stage were robbed late today by a highwayman, who after robbing the passengers, forced the driver of the International line bus to bring him back to Portland, where he escaped.

The gunman left Portland on the northbound stage and robbed the passengers at Woodland. He then forced the driver, George Hunt, to flag down the southbound bus which he boarded. After threatening the driver he took about $80 from 8 women and 9 men and sat beside the driver on the ride into Portland.

Last Span For Bridge Lifted

MARTINEZ, Sept. 29.—The last of the decks spans for the new Martinez Southern Pacific railroad bridge was lifted into place today before a large crowd of officials of the railroad.

The span, which is 506 feet in length, has formed the substructure cribbing for the erection of all of the eight structural spans. It was floated into its permanent position near the Solano shore, thus completing except for four small spans, the huge bridge.

Man Shoots Girl, Then Kills Self

ROSEVILLE, Sept. 29.—UP—W. F. Stocker shot and critically wounded Miss Dora Davis, 38, here today, and then committed suicide, according to police.

THE WEATHER

Fair and mild Tuesday and Wednesday; gentle north to west winds.

Wins Trial

ALEXANDER Pantages, millionaire theater magnate, and Eunice Pringle have been recast in the principal roles of a new trial, which the former was granted on charges of attacking the 17-year-old dancer.

New Store Will Be Built In Richmond

Another large day for building was reported from the office of City Building Inspector A. J. Hurley yesterday.

The largest permit of the day was issued to A. S. Whitesides who is to build a one-story store building.

The new building is to be located on the north side of Cutting boulevard, between Fourteenth and Fifteenth streets. It will cost $4000.

The work will be done by the owner.

A three room addition to his home on Esmond, between Lassen and Ventura will be built by B. V. Kane at a cost of $400.

W. W. McLarney will build a one-car garage to cost $150. The building will be located on Nevin avenue, between Eleventh and Twelfth streets.

Crash Victim To Be Buried Today

Funeral services will be held at 2 o'clock this afternoon from the Wilson and Kratzer chapel for Edward Heck, 25, who was killed in an automobile and street car crash at Twenty-third street and Nevin avenue Sunday night. Interment will be at Sunset View cemetery.

Heck is survived by his widow, Mrs. Mollie Belle Heck 698 Maude avenue, San Leandro; his parents, Mr. and Mrs. Henry Heck, of San Leandro and two brothers and two sisters, all residing in California.

Heck had come to Richmond to join his wife, who was visiting at the home of her sister, Mrs. Nora L. Purviance, director of the Richmond Health Center. Mrs. Heck is the daughter of Mrs. Jennie P. Loveless, 612 Twenty-second street.

Heck was instantly killed when his machine collided with a Key street car operated by C. E. Angel, 117 Crest avenue.

Heck's death was the second tragedy in the Loveless family within a week. A niece of the deceased, Joyce Loveless, 6 was killed at Bremerton, Wash., a few days ago. The child was the daughter of Clyde Loveless, U. S. N., a brother of Mrs. Heck.

Mrs. Heck came to Richmond to be with her mother at the time of the expected arrival of her brother with the body of his dead child.

Police Hunt Two In Search For Lost Mine

WEAVERVILLE, Sept. 29.—Two men, hunting for a "lost" gold mine told to them by a dying prospector, are the object of a search in the wilds of Trinity county, it was learned yesterday.

The men are C. V. Fredericks, 46 and Paul Peel, 35, both of Oakland.

Sunday their car was found by Trinity county officers. This led to the belief that they may be lost or have meet with an accident.

Police have no knowledge as to where the men might be, as the two have zealously guarded the secret location of the mine.

The last word received by relatives of the men in Oakland was a card sent by Peel from Weaverville on Sept. 5. According to relatives they said they would return in two weeks.

Fredericks befriended an old prospector who as he was dying, told him of the location of the secret mine in the mountains of Trinity county.

Committees Named By Legion Post

Activities of Richmond Post of the American Legion will be divided into nine groups during the ensuing term it was decided at a meeting of the executive committee of the post in the Memorial hall last night.

Harry Burt, newly installed commander of the post presided over the meeting, and appointed chairmen to fill some of the positions.

The activities will be divided into the following groups: Membership, welfare, community [illegible] ment, Americanization, athletics,

(Continued on Page 4)

OIL FIRMS SCORED IN LETTER

WASHINGTON, Sept. 29.—UP—Senatorial investigation of the "oil graft" charges against the Interior Department which is alleged to have played into the hands of a combination of big oil firms seeking control of oil shale deposits in western Colorado, valued at forty billion dollars appeared likely tonight.

Chairman Gerald P. Nye of the Senate public lands committee which conducted the Teapot Dome investigation involving some of the same companies alleged to be implicated in the present charges announced tonight the allegations would have to be investigated.

They were made in a letter of resignation submitted to Secretary of Interior Wilbur last night by Ralph F. Kelly, for 25 years in the Interior department and in recent years chief of the public land office at Denver. He said a combination of oil companies, including some which figured in the Teapot Dome affair were being allowed "fraudently" and through political pressure to win concessions from the department at the expense of the public.

Secretary Wilbur announced tonight he had refused to accept Kelly's resignation and directed him immediately to file names of companies referred to in his letter. He suspended Kelly pending investigation. He also said he welcomed fullest investigation of the department's handling of oil shale claims.

Wilbur issued a lengthy statement.

KELLY READY TO MAKE STATEMENT

NEW YORK, Sept. 29.—UP—Ralph F. Kelly will place himself at the disposition of the senate if an investigation is proposed of his charges of fraud in connection with the award of Colorado oil lands, he promised in a formal statement tonight.

He also said that he desired to repeat the charges he made in his letter of resignation to the Interior department, and that he would amplify them if asked to do so by the senate.

Kelly's statement:

"I have read the statement issued by Secretary Wilbur in reply to my letter of resignation. Much of what Mr. Wilbur says is correct, much of it is immaterial and in no way applies to the public oil shale domain in Colorado, much of it requires clarification.

"If congress desires to investigate this issue as Senator Nye tonight suggests, I will naturally place myself at disposition of the senate and will later amplify any charges I made in complete detail.

"I do not regard myself as any longer an employe of the interior department, and I wish to repeat in specific terms the charges outlined in my letter."

Death Calls W. J. Glasson

Funeral services for Edward J. Glasson, of El Cerrito, who died yesterday at his home 6915 Manila avenue will be held today from St. John's church, El Cerrito at 9:30 o'clock. Interment will be at St Joseph's cemetery.

Glasson was 55 years of age. He leaves a widow, Delia Glasson. He was the father of Irene and James Glasson and Mrs. M. D. Pope.

He was a native of California.

Search For Body Of Suicide Fails

SAN FRANCISCO, Sept. 29.—UP—A search of the Pacific ocean off Cypress Point for the body of Maj. Albert Kalb, 61, U. S. A. retired, who jumped from the steamer Harvard early today, had failed tonight.

W. T. Helms At School Meeting

W. T. Helms, superintendent of schools, is expected home from Lake Tahoe, where he is attending the annual state convention of school superintendents, the latter part of this week.

Honored

HARRY LONG of Chehalis, Wash., who will represent his state at the Pacific International Exposition at Portland, Ore., having won high honors as the healthiest boy in the state 4-H club entrants at the Washington State Fair at Yakima.

ROAD WORK REQUESTED

If you drive south on Tenth street, between Ohio and Cutting and happen to get behind a truck you are simply out of luck. If you come north, and a truck happens to be ahead of you, the same condition prevails.

In the center of this portion of the street is a parkway, and the driveways on either side are so narrow, that it is impossible to pass a heavy vehicle.

This condition was brought to the attention of the council last evening by Councilman Russell Meyer, who urged that rock shoulders be added so that the roadway would be widened.

City Manager J. A. McVittie said that the matter had been looked into by the city engineer, and as soon as the first rain arrived, so that digging would be easier, the necessary repairs would be made.

KIWANIS TO HEAR TALK

Paul G. Trotter of San Francisco will be the speaker of the day at the meeting of the Richmond Kiwanis club tomorrow at the Hotel Carquinez.

Trotter will speak about "Salesmanship."

Charles Brombacher will be chairman of the day.

Nomination of officers will be held by the group on Oct. 8 at the Hotel. Election will be held Nov. 5.

Traung Asks For Probe

SAN FRANCISCO, Sept. 29.—UP—A complete investigation of his own conduct in office was requested of Governor C. C. Young by Charles F. Traung, state athletic commissioner, here today.

Traung said he would take no cognizance of the report by the San Francisco grand jury, which contained a demand that the governor ask for Traung's resignation.

"The grand jury report does not contain any actual fact or bit of evidence," Traung said.

Suicide Attempt Foiled By Dog

SAN FRANCISCO, Sept. 29.—UP—A shepherd dog prevented a Mexican laborer from committing suicide in San Francisco bay today.

The dog, owned by Lieut. John Pryne of fireboat company No. 1, jumped into the bay after the laborer and held him up until Pryne could swim out and take the man ashore. At emergency hospital the workman said his name was Joseph Haldez.

"DAYLIGHT" PLAN IS HIT

A communication was read at the meeting of the city council last night from the city commissioners of the City of Fresno, in which they went on record against the proposed daylight saving law. The Fresno group stated the measure was ridiculous and would work a hardship on the people.

J. A. Christie, division superintendent of Santa Fe spoke on the proposed law, stating it was a misnomer, and did not say daylight at all.

Christie said where manufacturing industries wanted to adopt such a plan for their own convenience, there was no objection to it, but to attempt to force such a plan on all of the people of the state would only cause confusion and misunderstanding.

In case of families, Christie said you would have the head of the house going to work under one time, the children starting to school on another time, and possibly the mother working under a still different plan.

The speaker said the adoption of the law would only make troublesome conditions, would serve no real purpose, and should be defeated.

Auto Wrecking Permit Issued

T. J. Shellenberger was granted a permit by the city council last evening to establish a place for wrecking and selling used autos at 325 and 327 Fourth street.

There was some discussion regarding the necessity of old shacks being removed. Chief Cooper said they were a fire menace, and were in such condition that they could not be repaired.

The permit was granted providing the necessary repairs could be made to the satisfaction of the building committee and the fire chief.

Ford Co. Wins Title Action

MARTINEZ, Sept. 29.—A decree quieting title to the Ford Motor company's plant site in Richmond was handed down today by Superior Judge H. V. Alvarado.

The company, in a friendly action sued the city of Richmond and other parties, the action being brought to clear up street rights and channel privileges.

Through City Attorney Thomas M. Carlson the city presented its rights, but made no effort to block the sought decree.

Fox Farm Will Be Established

L. Hileman will establish an experimental fox farm on Forty-fifth street between Wall and Center avenue. The permit was granted by the city council last night on the recommendation of the planning commission that the property be rezoned from residential to commercial.

Judge C. Odell Files Report

The receipts of the police court for the past month amounted to $420 according to a report filed by Police Judge C .A. Odell with the city council last night. Violations of the motor vehicle act brought in $250 and other misdemeanors $170.

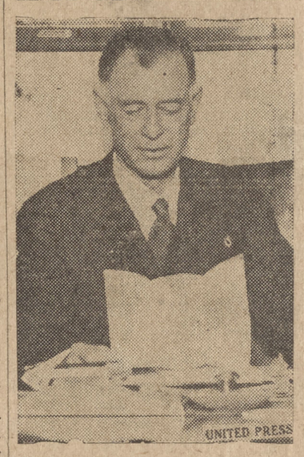
F. T. Stoddard Is Transferred

Fay T. Stoddard, conductor on the Santa Fe the past several years in Richmond, has been transferred to Fresno on the Fresno-Bakersfield run. His family, who reside at 541 Barrett avenue, have not yet joined him.

RANDALL ILL

Following an operation at the Merritt hospital, Oakland, W. E. Randall is convalescing at his home at 336 Thirty-sixth street. Although able to see visitors, Randall will be confined to his bed for a short time yet.

Studies



SEN. KEY PITTMAN of Nevada, who presided at a series of hearings in principal cities of the Pacific coast in connection with an exhaustive study of foreign trade and an effort particularly to stabilize trade with China.

CITY GETS INVITATION

Mayor A. B. Hinkley and the members of the council have received an invitation to join in the "Autumn Auto Tour" in the interest of the Castle Crags Wilderness State Park project, which will take place October 4 and 5.

On Saturday evening a reception will be held at Dunsmuir in honor of state, federal and municipal officials who will be in attendance, and the mayoralty group of northern California and southern Oregon.

On Sunday morning there will be a program in the interest of scenic conservation. Afterwards the Castle Crags Wilderness area will be viewed by visiting groups, directed by competent guides.

Inhalator For Wilson, Kratzer

Wilson and Kratzer, morticians are installing an inhalator for emergency service. This will be the only apparatus of its kind in the hands of a business firm.

As soon as the inhalator is installed, Chief W. P. Cooper announced that the fire department would refuse to respond to emergency calls, where an inhalator was needed.

Heretofore the inhalator of the fire department, has been the only one in the city, and much efficient and gratituous work has been done by the members of the department.

Initiation Will Be Held By Elks

Initiation of a class of candidates is scheduled for the Richmond Elks when they meet tonight at the clubrooms.

The entertainment will follow the meeting will consist of a lecture on big hunting in Africa and Alaska. The talk which will be illustrated, will be made by J. W. Tomkins.

Driver To Face El Cerrito Court

Alleged failure to answer to a traffic citation resulted yesterday in the arrest of Frank Milan, 781 Twenty - third avenue Oakland who is being held in El Cerrito city jail.

Milan was arrested on a bench warrant issued by Police Judge A. G. Thompson.

City, S. O. To Enter Agreement

The mayor and city clerk were authorized by the city council last evening to execute an easement agreement with the Standard Oil company to take care of the change of location of a sewer on Scofield avenue.

FUEL SOLD 18 CENTS GALLON

With the revalation yesterday that a majority of El Cerrito service stations are selling gasoline at from one to three cents per gallon less than the standard price of 21 cents, a gas war that will out-rival the war that raged during the summer, looms in the eastbay, according to service station proprietors.

Although practically no service stations are displaying cut rate signs, the majority have been selling under the set price the past two or three days.

The cut rate war at present seems to center in El Cerrito and Oakland, the majority of Richmond stations maintaining the 21 cent per gallon rate.

Blames Others

Each of the El Cerrito service station operators blame the start of the civil war on another operator, but the consensus of opinion among all, is that the dealers who started the cut in rates may be put on a two cent differential instead of the present four cent basis.

18 Cent Gas

With the exception of the Western gasoline stations, which have been selling at 18 cents per gallon, the lowest price on a major gasoline was found at a service station on San Pablo avenue, where Richfield was being yesterday at 18 cents a gal

The operator, as the n of other operators in El have declared, said he creased his prices Sunday ing when neighboring did so.

At another service station El Cerrito, the dealer is selling gasoline at 20 cents per gallon, and said that he had never raised his prices.

Prices Drop

Union, Shell, Gilmore and Red Crown gasolines are being sold for 19 cents at a third service station.

The operator at this station said he dropped his prices Sunday, to keep in line with other stations.

At a Fairmont and San Pablo avenue station, Union, Shell, Red Crown, Gilmore and Richfield, all makes of which have been sell-

(Continued on Page 8)

TWO ESCAPE IN CRASH

Two Richmond men had a narrow escape from death or injury yesterday when their machine turned over five times on the Twenty-fourth street hill near Cutting boulevard.

Fred Domingo was slightly injured, suffering cuts and bruises. He resides at 4760 Meade avenue.

Paul Nidreck, 23, of 1918 Cutting boulevard, the driver of the car, escaped without injury.

According to police reports, Nidrick was driving his machine over the hill when he lost control of the car. It plunged off the hill, turned over five times and rolled to the bottom.

The car was badly damaged.

Lions To Hear Oakland P. M.

Nat Friend, Oakland postmaster will be the guest speaker at the meeting of the Richmond Lions club today. Friend will speak on "The Flying Mail."

John A. Miller, local postmaster, will be chairman of the day.

Alpha Lodge To Receive Visitors

Alpha lodge of Masons will be hosts tonight to members of the Brooklyn lodge of Oakland. The visitors will confer the third degree. There will be entertainment in the banquet room. E. C. Labrecht, W. M., will preside.

DRINK PERMIT

The city council last night granted a soft drink permit to L. Tytler who conducts a restaurant at 1321 Macdonald avenue.

M. W. A. NINE DEFEATED BY BERKELEY

The Richmond Modern Woodmen of America went down to a six to three defeat before the Berkeley Woodmen Sunday afternoon on the Bayview lot.

Hard hitting was in order with the two lodges Sunday. The locals collected 14 bingles, while the Berkeley athletes garnered 15 hits. Crocker of Richmond and Murphy of Berkeley each earned three hits out of four times at bat, while Poinelli of Richmond and Alcatras of Berkeley each tapped the agate for four bases.

Sargent did the chucking for Richmond, fanning six opponents. Hansen of Berkeley also whiffed six Richmond sluggers.

The box score:

Richmond M. W. A.

	AB.	R.	H.
McGill, 1b	5	1	1
San Miguel, lf	4	0	1
Gillan, ss	3	0	2
Poinelli, 3b	4	1	2
Gough, cf	4	0	2
Sargent, p	4	0	1
Crocker, rf	4	1	3
Gaillard, 2b	4	0	1
	37	3	14

Berkeley M. W. A.

	AB.	R.	H.
Paul, cf	5	0	1
Maderas, ss	5	1	1
Brown, 2b	5	0	2
Faurer, 3b	3	0	1
Alcatras, 1b	4	1	1
Crockett, lf	3	1	1
Balaman, lf	1	0	1
Murphy, rf	4	0	3
Corey, c	4	1	2
Hensen, p	4	2	2
	37	6	15

Summary: Home runs—Poinelli, Alcatras. Three base hits—Gillan. Two base hits—Corey. Struck out—By Hensen, six; by Sargent, six. Bases on balls—Off Sargent, none; off Hensen, none.

Seals, Ducks Split Double Header Card

SAN FRANCISCO, Sept. 29.—UP—All teams of the Pacific Coast league were idle today except San Francisco's' Seals and the Portland Beavers, who played off two postponed games and divided them.

Five runs in the third inning of the first game gave Portland an 8 to 2 victory and the Seals came back strong to win the next contest, 4 to 2.

During the four series of games that start Tuesday will be against Hollywood at Los Angeles. The Stars hold a seven game lead over Los Angeles with only three weeks to play.

The other contests Los Angeles will play Portland, San Francisco at Seattle and Sacramento here against the Missions.

Hugo Desler Back From Hunt

Hugo Desler of the Western Auto Supply company has just returned from a two week's sojourn in Lemoore with Charles Thompson. Desler reports successful dove hunting while in the valley.

FALLBROOK—El Real Hotel formally opened to public.

Fans Wear Uniforms

LITTLE PATSY LYONS is an ardent White Sox fan and doesn't miss a game. He wears their uniform and is shown here talking it over with Nick Altrock, left, and Art Shires, right.

Buzz Arlett Wins Shoot Prize Here

Although trap shooting for the first time, "Buzz" Arlett, Oakland heavy-hitting outfielder, won the Judge A. A. Alstrom trophy Sunday at the trap shoot on the lower Skow ranch. Arlett's score was 21 out of a possible 21 at a distance of 18 yards.

Frank Fabretti captured second place with a score of 20 out of 25 at 19 yards.

Mose Moitoza was high man of the day's shooting. He scored 48 out of 50. Alstrom and Becker were second with 47 out of 50 chances.

The following are the scores of the trophy shoot:

Arlett	21x21—18 yards
Fabretti	20x25—19 yards
Meyers	19x25—16 yards
Dreyspring	19x25—18 yards
Rison	18x25—18 yards
Slusser	18x25—18 yards
M. Marceyes	17x25—18 yards
Woodcock	17x25—16 yards
Hanson	17x25—18 yards
Stig	17x25—16 yards
Bush	14x25—16 yards
Harcourt	15x25—16 yards
Moe	13x25—16 yards
Dougall	16x25—18 yards
Cauckwell	12x25—18 yards
Cole	9x25—16 yards
P. Marceyes	8x25—16 yards
Whitney	7x25—16 yards
Kamb	3x25—16 yards

The following are the scores for the day:

Mason	9x25	Rison	38x50
Grover	13x25	Hanson	32x50
Eicher	10x25	Cole	17x50
Becker	47x50	Stig	31x50
Kamb	17x50	Harcourt	27x50
Alstrom	47x50	Whitney	13x50
Meyers	26x50	Moe	40x75
Slusser	35x50	Dreyspring	
Moitoza	48x50		57x75
Coe	41x50	Arlett	55x75
Caukwell	31x50	Fabetti	64x75
Bush	25x50	Dougall	53x75
P. Marceyes	22x50	Woodcock	45x75
M. Marceyes		Skow	45x75
	36x50		

NATION WAITS WORLD SERIES OPENER

PHILADELPHIA, Sept. 29.—UP—One half of the great pre-series mystery was solved today when "Sergeant" Gabby Street marched his St. Louis Cardinals into town and announced that Burleigh Grimes will pitch for the National League champions in the opening game of the 1930 world series on Wednesday.

Since the business of winning the first game is of paramount importance, statistics showing that the club which does so almost invariably wins the world's championship as well—the Sergeant's announcement was received with due solemnity and heated debate by the fans gathered here for the series.

But did old Cornelius McGillicuddy oblige with a similar announcement, and set the minds of the fans at rest as to who will hurl for the Philadelphia Athletics in the opening? In a word he didn't.

Connie Mum

Connie loves his little mystery. He made capital of it last year when he sprung Howard Ehmke upon an unsuspecting baseball public and nine completely baffled young men in Chicago uniforms. There seems little that Connie can spring this time to rival that masterly coup, but he's smiling that inscrutable Irish smile and saying nothing.

The Cardinals arrived too late to work out today.

Starting Grimes is Gabby's logical move, and is no surprise. The veteran spit-ball pitcher may prove just the man to stand those heavy-hitters on the Athletics payroll on their heads. Faber of the Whitesox, another spit-ball artist, did so several times this season, and the A's haven't looked over much in the way of moist ball delivery in their circuit.

Cards Confident

As far as condition, morale and good intentions are concerned, the rest of the Cardinals appeared to rate a grade of A-1. Jimmy Wilson, first string catcher, will not see service in the series unless an emergency arises. Young Mancuso has stamped himself a quite adequate substitute. Frankie Frisch has a sore paw, but he's the sort of second baseman who could play superlative ball with his hands in splints.

National league fans are beginning to flock to Philadelphia proclaiming loudly that this is their year, and that the Cards are going to knock off the Athletics much as the Boston Braves did 16 years ago.

Grove Starts (?)

One old baseball man who never misses a world series said tonight that Connie Mack would start "Lefty" Grove, his ace, and play them from the top this time, Earnshaw, Shores, Walberg, Rommell and Quinn.

"If he does that," piped up a rabid National league adherent, "the series won't go five games.

R. COOK HEADS CAGE LEAGUE MANAGERS

Roy Cook, manager of the Santa Fe cagers, was named president of the 1930-31 Richmond city basketball league last night at a meeting of league managers in the Roosevelt Junior high school gymnasium.

B. C. Hitt was re-elected treasurer of the league association. Ivan W. Hill, city recreational director, will share the directorship of the league with Cook.

Many league matters of importance were settled last night by the several managers present at the second meeting of the season.

It was decided that each squad would be limited to eight men, and would have its special night for practice in the Roosevelt and Longfellow Junior high school gymnasium. A playground director will be in charge on each practice night.

The league games will be played every Monday and Thursday evening. The games may probably be played in the Roosevelt Junior high school gym, although the Richmond Union high school gymnasium is still under discussion.

The league cup won by Garfinkle's Clothiers last year was offered by Manager Marcus as a perpetual trophy. It will become the perpetual possession of a three time-winner.

The league will probably be divided, according to present plans, into A and B divisions. The league schedule is now being mapped out by Hill, and will be presented to the managers for consideration next week or the end of this week. The schedule will probably start about the first of November.

The managers present at last night's league meeting were: Roy Cook of Santa Fe, Harry Skow of the Odd Fellows, E. Marcus of Garfinkle's Clothiers, E. Jonnson of McRacken's Clothiers, and Earl Tandy of the Mastercraft Roofers.

Three Girls On Cycle Brings Fine

FISHKILL, N. Y. —UP— That line about three being a crowd has received judicial recognition. Judge Warren of this place fined a young man, whose name was withheld, $10 for carrying three girls on his motorcycle. The charge was "overcrowding." Just how the load was distributed wasn't made clear.

Opossum Caught With Big Family

SCOTTDALE, Pa.—Caught ferrying her family of 12 across Jacob's creek, a mother opossum was captured and given refuge in the game preserve on Creek Hills, west of here. The brood were riding on their mother's back.

These boys from St. Louis will murder 'Lefty's' fast one and when they've beaten him there'll be nothing to it but four straight for the Cardinal's."

LEGION ELEVEN WINS FIRST CONTEST

With Mayor A. B. Hinkley kicking off the first ball, and Richmond Post of the American Legion football team defeating the Oakland Acorn Athletic club by a 6 to 0 score, American Legion football was officially opened in Richmond Sunday.

The size of the score however does not do the Legion team justice, as the local boys consistently outplayed the Oakland club, and were playing almost the entire game in the visitors' territory.

At only one time during the entire game did the Acorns threaten to score. This was in the last few minutes of the fourth quarter, when a long pass, Mathews to Richmond, and a lateral, Richmond to Williams, brought the ball to Richmond's two-yard line.

Legion Holds

With less than two minutes to play, the Legionnaires held for downs when a penalty for offside placed the ball on the six-inch line.

The legion line tightened up like the proverbial clothesline, and smothered the next play, the whistle ending the game before the Acorns could try again.

Richmond outplayed the Oakland team in every department of the game, and only ragged playing at crucial moments prevented the score from being much larger.

Acorns Held

As an example of the brand of football the Legionnaires were playing, statistics show the Acorn team made only two first downs from scrimmage, while the Richmond aggregation consistently bucked the ball from one end of the field to the other.

Claude Samples, coach of the local squad did not have much to say after the game, apparently holding himself in hand until practice tonight, which will be held in front of the Longfellow Junior high school.

From various expressions which formed on the coach's face when fumbles and blocked plays proved costly to the Legion team however, players on the squad are in for a few torrid minutes tonight, and some hard drilling in fundamentals before next Sunday's game, when the Legionnaires will tangle with the Ashby Athletic club on the high school gridiron.

Good Defense

The Richmond line proved a bulwark of defense against the bullet like attacks of its opponents' backfield, and successfully smothered nearly every play the Acorns attempted.

The lone score of the game came early in the third quarter, after a series of line plunges by Freeman and Clark, and end runs by Youngs and Lehmkuhl brought the ball to the Acorn's five-yard line. Here the locals lost the ball on one of their numerous fumbles, and an Oakland man recovered.

Bertillion, fullback on the Acorn team, attempted a line plunge, but fumbled the ball, which was recovered over the line by Cooper, Richmond end.

Cooper Good

Cooper, by the way, was outstanding in the line, recovering three fumbles, and holding his end of the line almost intact against the hammering of the Acorn backfield.

Myers, who played the entire game at center for the Legionnaires, ably took care of his portion of the line, and very few yards were made through the sides of the line, which was protected alternately by Irwin, Sheehy, Peters, Neckel and Frazier at guards and Adcock, Carson, Bonneville and Lusk at tackles.

B. MacAllister, Milne, Pitts, F. Sheehy and Cooper filled the positions and literally smothered any attempts to gain on their respective sides.

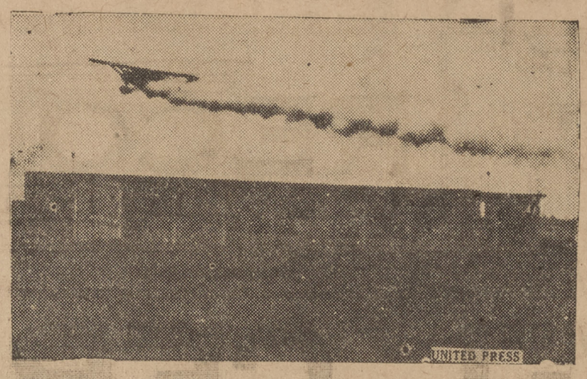
Clark and Freeman, alternating at the full back position, were responsible for most of the yardage gained through the line, while halfbacks Hurley, J. MacAllister, Lehmkuhl and Jester gained considerable more distance around the ends and through the tackles.

Youngs Lauded

Hurley, and Youngs, who played quarter, were responsible for the longest gains of the day, Hurley ripping off a 20 yard run in the first quarter, and Youngs a 15-yard run in the third. Youngs also returned a punt 42 yards while playing safety during the last quarter. Coach Samples, who relieved Youngs in the second quarter, also made some nice gains.

In accordance with the team's policy of appointing a captain before every game, Bud Clark was named Sunday.

The Takeoff



EXCLUSIVE PHOTO shows Lieut. Harold Bromley on his unsuccessful takeoff from Kasugaura, Japan on an attempted Pacific Ocean flight.

RICHMOND HIGH WILL MEET FROSH

The Richmond Union High school varsity grid squad is tentatively scheduled to tangle with the second and third string University of California Frosh next Friday or Saturday.

The game has not yet been definitely arraigned, but it is fairly certain that the Berkeley college boys will either be played Friday afternoon or Saturday. The scene of the tussle will be the Richmond Union High school gridiron.

Coach Frank Ribbel's eleven will have exceptionally tough opposition in the California Frosh. The Richmond boys have had a rather erratic football career thus far during the 1930 season. They opened their year by trouncing the Oakland Technical High school outfit six to nothing. Then they tied University, 0 to 0. They lost to McClymonds by a score of two to nothing. Richmond was defeated six to nothing by San Leandro, and last week was trounced by an 18 to 6 score by Oakland High school.

The Richmond defense seems to be fairly strong, but when a speedy attack is required, the locals are found lacking. If Richmond can break out of the groove in which they are now struggling, it will be well prepared to meet the strong teams of the Alameda County Athletic league. It has had plenty of hard knocks this season, and if the school of experience is a good tutor, the locals should be in complete readyness to serve creditably in league competition. Richmond's team has all the qualities of a strong high school squad. Those faculties only need developing, and it is to this end that Frank Ribbel is driving the boys zealously night after night on the Richmond gridiron.

Local Boy Defeated In Tennis Play

Clarence Garibotti, captain of the Longfellow Junior High school tennis team, yesterday lost to Jay Cohn, national boys' tennis champion, in the Pacific Coast championship tournament at Berkeley. The scores of the match were 6-0, 6-2.

Garibotti fought a plucky battle against his more experienced rival, but the national titlist gradually assumed the upper hand over the local competitor.

Jimmy Hurley was scheduled to play yesterday in the championship play, but his match with Douglas Gabriel was postponed because of rain. This match will probably be played today on the Berkeley Tennis club courts.

Bear Loses In Rifle Argument

LOVELAND, Colo.—F. A. Neville likes bears, and is willing to meet them half way. One bear that Neville met near here refused to let the Lovelander continue his journey on a narrow trail. Four shots from Neville's rifle won the argument, and guests at two barbecues voted the bear's meat splendid.

MARTINEZ—$55,000 plant of Martinez Steam Laundry on Estudillo and Escobar streets opened for inspection.

RICHMOND HIGH COUGARS WILL MEET BEARS IN GAME

BERKELEY, Sept. 29.—Bringing a string of 20 lettermen and boasting weight and power in backfield and line, a formidable team from Washington State college will travel south this week to engage the University of California football team in the first conference game of the season at Berkeley.

The game will be the tenth in the history of Bear-Cougar competition on the gridiron, and the third since Orin "Babe" Hollingbery has been coach at the Pullman institution. California teams have won eight of the nine games played since 1922.

Last year, on the eve of departing for Philidelphia to play the University of Pennsylvania, the Golden Bears wrested a 14 to 0 victory from the state college team, but victory was uncertain until near the close of the game. The Bears scored both of their touchdowns on pass plays, one from Ben Lom to Bob Norton; the other Stan Barr to Lee Rice.

All four of these men are lost this season, and the only Bear who was directly concerned with the scoring who returned this season is Ted Beckett, who made good both tries for point.

The invading Cougars are led by their all-coast fullback, Elmer Swartz, whose battering-ram assaults on the line will give the Bears cause to worry. Other luminaries from Pullman are Carl Ellingsen, triple-threater; Oscar "Stub" Jones, halfback; a quartet of ends, George Hill, Sam Hansen, John Hurley and Lyle Maskell; and Harold Ahlskog, two-year veteran at tackle.

ODD FELLOWS BEAT ROLA NINE

With the score 0 to 0 at the beginning of the ninth inning, the Richmond Odd Fellows battled their way to a 1 to 0 victory over the Rola club of Oakland Sunday afternoon on the San Pablo diamond.

Fagundas, Rola chucker held the local swatters to three hits until the fatal ninth inning. Then Gordon went out, Sorenson to DeRiso, and Viano doubled. Gualdoni was purposely walked. Banducci won the contest by singling, thereby bringing Viano home.

Both Johnny Babich of Richmond and Fagundas of the Rola Oakland team chucked stellar ball for their respective nines last week-end. Babich allowed but three hits, while Fagundas was nicked for five Babich whiffed five Oaklanders, while Fagundas struck out four local batters.

The box score:

ODD FELLOWS

	AB.	R.	H.	E.
Da'ev, 3b	4	0	1	0
Gordon, ss	4	0	0	2
Viano, 1b	4	1	2	1
Gualdoni, c	2	0	1	0
Banducci cf	4	0	1	0
J. Pinto, lf	3	0	0	0
Murphy, rf	1	0	0	0
Babich, p	3	0	0	1
Tota's	28	1	5	4

ROLA CLUB

	AB.	R.	H.	E.
Atkins, rf	3	0	0	0
Sorenson, 3b	4	0	0	0
Brain, cf	4	0	0	0
James, lf	4	0	0	0
Figoid, c	4	0	0	0
Breakes ss	4	0	1	0
DeGrazia, 2b	3	0	0	1
DeRiso, 1b	3	0	0	0
Fagundas, p	3	0	2	0
Totals	32	0	3	1

Summary: Two base hit—Viano. Base on balls—Off Babich 1, off Fagundas 4. Struck out-By Babich 5, by Fagundas 3. Hit by pitched ball—Murphy. Double play—Gordon to Pinto to Viano. Umpires—Prolo and Gray.

Moitoza Nine Disbands After Good Season

The Moitoza Fords are disbanding until 1931 after an exceptionally successful season on Richmond and other eastbay diamonds.

The Fords have played 17 games this year. Of these, 15 were outstanding victories. The remaining two were defeats at the hands of the Gibson Drug company and the Richmond Odd Fellows.

The Moitoza outfit reorganized at the beginning of this year's baseball season, and from their first game, they marked themselves as one of the flashiest outfits cavorting on local diamonds.

Sid Martin was probably the chief factor in many of the Moitoza victories. He twirled a consistently fine brand of baseball during the entire season.

This year's Moitoza Fords lineup included the following athletes: George and Paul Moitoza, Howard Goldsworthy, Guido Prolo, Poinelli, Bill Hampshire, Bartoli, Frank Peacock, Cola, Gillan, Gus Figueiredo, Charles Matteri, Gerald Scary, Bill Wickesser, Mervin Gray, Tony Gregory, Anthony Moitoza, and Sid Martin.

Tennis Players Of Richmond Win In Coast Series

Richmond tennis stars did well in the Sunday competition in the Pacific Coast championship tournament at Berkeley.

Phil Carlin, Sylvia Seawright, and James Hurley came out of Sunday's competition unscathed.

Sylvia Seawright defeated Jennie Stark, also of Richmond, 10-8, 6-3. James Hurley and Phil Carlin conquered Fred Meyers and Carl Bernthal in straight sets. Helen Dunning lost to Alice Cooper by a close margin. Phil Carlin defeated Gorrill Butler by a 6-0, 6-4 score.

Darrow Sutton and Adrian Newman lost to Trainer and Cosgrove, number one seeded doubles, by scores of 6-2, 6-1.

Society NOTES

What's Doing Here Today

ST. JOHN'S CHURCH: Benefit whist party tonight starting at 8:30 in parish hall.

* * * *

PERES P. T. A. meeting today at the home of Mrs. L. B. Brown 822 Ninth street.

* * * *

RICHMOND P. T. A.'S will sponsor dressmaking and millinery class in Grant school. Registration today from 9 till 12 o'clock.

* * * *

ST. EDMUND'S GUILD regular meeting this afternoon in Guild hall.

RICHMOND CLUB ENTERTAINS AT WHIST PARTY

An afternoon of cards provided pleasant diversion for the members of the Richmond club who met yesterday afternoon in the Richmond clubhouse. High scores were held by Mrs. Lowney, Mrs. H. Pederson, Miss Caroline Rogerson and Mrs. Cicil Baughman.

Hostesses for the afternoon were Mrs. W. W. Scarlett, Mrs. J. W. Smiley and Mrs. Cecil Baughman.

The next meeting will open with a covered dish luncheon held at noon to be followed by a business meeting.

"Three Wise Fools," a three-act farce, sponsored by the women of the club is to be presenten October 7 in the Roosevelt auditorium and is being anticipated by many who plan to attend. The cast is composed of members who have had previous experience and an entertaining presentation is promised. Mrs. Zelda Chapin is directing the production.

BOOSTER CLUB ENTERTAINS WITH WHIST

The first in a new series of stay-at-home whist parties conducted by the T F. B. Booster club apened yesterday at the home of Mrs. Carrie Sargent, 330 Eleventh street.

Those who held high scores for he afternoon were: Mrs. Belle Viramonte, Mrs. Margaret Simpson, Mrs. Anna Keaten and Mrs. G. Baker, Mrs. E. Valler won the door prize and other prizes were awarded to Mrs. Mae Campbell and Mrs. G. Lewis.

This is the second series of whist parties sponsored by the club and Mrs. Sargent will again open her home next Monday afternoon for the second game.

Operators To Hold Food Sale

Sponsored by the telephone operators a cooked food sale is to be held Saturday in Grimsley's furniture store, Sixth and Macdonald avenue. A tempting selection of foodstuffs will be offered, those in charge state.

Point Baptist Aid To Meet

Mrs. William Arnold will act as hostess to the Point Baptist Ladies' Aid tomorrow. The members will meet at the natatorium at eleven o'clock.

No More Gas In Stomach and Bowels

If you wish to be permanently relieved of gas in stomach and bowels, take Baalmann's Gas Tablets, which are prepared especially for stomach gas and all the bad effects resulting from gas pressure.

That empty, gnawing feeling at the pit of the stomach will disappear; that anxious, nervous feeling with heart palpitation will vanish, and you will again be able to take a deep breath without discomfort.

That drowsy, sleepy feeling after dinner will be replaced by a desire for entertainment. Bloating will cease. Your limbs, arms and fingers will no longer feel cold and "go to sleep" because Baalmann's Gas Tablets prevent gas from interfering with the circulation. Get the genuine, in the yellow package, at any good drug store. Price $1.

Always on hand at
LA MOINE DRUG CO.

R. PAASCH CLAIMS BRIDE AT CEREMONY

At one of the largest and most impressive weddings of the season, Miss Mary Callegari and Richard Paasch were united in marriage before the altar of the St. Mark's church, Sunday afternoon.

Rev. Father Michael Crotty officiated at the beautiful ceremony in the presence of several hundred guests.

The church was massed with pink and white flowers with huge baskets of chrysanthemums, palms and greens forming a lovely background for the nuptial service.

Soft music was played throughout the ceremony by an orchestra which also played the wedding march. "Ave Marie" was the vocal number presented.

Mrs. Mary Boetti was the matron of honor. The bridesmaids were Miss Mary Squeri and Miss Edith Garavini. Little Blanche Regalia and Rena Sannazzari were the dainty flower girls.

The bride entered the church on the arm of her father and was exquisite in a gown of gleaming silver and white. A cowl neck and quaint puff sleeves fashioned the lovely bridal dress over which fell a veil of tulle and lace cascading from a crown of lace and pearls. A wreath of orange blossoms encircled the waist of the gown which was modeled in slender lines with a gracefully flared skirt. Her shower bouquet was of lilies of the valley and bride's roses.

The flower girls that led the procession wore pretty frocks of peach silk and carried baskets of flowers and rose petals.

Miss Mary Squeri and Miss Edith Garavini, the bridesmaids, were gowned in satin with a wreath of silver leaves in their hair. Their crystal beads added another silver note to their costumes.

Miss Squeri's gown was of peach satin and Miss Garavini wore a lovely frock of Nile green satin. They wore slippers to match and carried sweet peas.

Robert Paasch served his brother as best man and the ushers were Jerry Solich and Alex Morrison.

Following the ceremony an elaborate reception took place in the Brotherhood hall with 105 guests in attendance. The tables at which they were seated were beautifully decorated with ferns and sweet peas. Baskets of pink and white flowers provided lovely centerpieces for each table. A large wedding cake was placed before the bride and bridegroom which they cut and served to the assembled guests.

Several hundred guests were present at the dance which took place in the evening. A bevy of flowers and greenery adorned the hall in which the nuptial ball took place.

Upon their return from a honeymoon trip to Lake Tahoe, Mr. and Mrs. Paasch will reside at Sixth and Chanslor, where their home has been completely furnished.

The marriage united two of Richmond's pioneer families. Mrs. Paasch is the daughter of Mr. and Mrs. Cornelius Callegari, who are well known in Richmond affairs. She is a graduate of the Richmond Union High school.

Paasch is the son of Mr. and Mrs. R. F. Paasch of Tunell avenue, West Side. He attended St. Mary's college after his graduation from high school and is now a member of the Richmond Fire department.

MISS GOODWIN WALTER BLACK ARE MARRIED

The announcement of the marriage of Miss Olive Goodwin to Walter Black has just been made to their friends here. The wedding took place Saturday in San Francisco. They were attended by Mr. and Mrs. George Colclough.

The bride wore a suit of claret flat crepe and Mrs. Colclough wa garbed in navy blue.

Mrs. Black is the daughter of Mr. and Mrs. R. L. Goodwin, of 236 South Fifth street.

Black is the son of Mr. and Mrs. Carl B'ack of Enterprise avenue.

The young couple will make their home at 224 Sixth street.

Formans Have Anniversary Party At Home

Rev. and Mrs. G. W. Forman who will be remembered by many as a former pastor of the Community Methodist church here, celebrated their silver wedding anniversary at their home in Alhambra, recently. A letter was recently received here from Forman telling of many interesting incidents that had taken place and also of their son Maurice and his wife who had just completed a visit with them before his acceptance of a position as mathematic teacher and coach of athletic activities in the senior high school at Fow'er. He resigned his position with the junior high school here in July.

Mrs. G. W. Glum Is Paid Honor

Mrs. G. W. Glum was the honor guest at a dinner given by Mrs. P. A. Thompson in occasion of Mrs. Glum's birthday anniversary yesterday. Among the guests invited were several from San Francisco and Berkeley.

W. C. O. F. Will Hold Whist Party

A whist party sponsored by the Women's Catholic Order of Foresters will be held Wednesday evening in Memorial hall. In addition to the door prize there will be many other attractive awards.

F. B. LODGE TO GIVE OLD TIME DANCE

Thursday evening will open the first of a series of dances conducted by the Square Dance club of the T. F. B. Both modern and old time dances will be enjoyed and a special feature of the evening will be the drill to be presented by the honor winning team of the Brotherhood. The evening promises to be an entertaining one and the public is invited to attend.

Elmer Leggetts Return From Trip

After an enjoyable two week's vacation spent at Clear Lake Highlands Mr and Mrs. Elmer N. Leggett with their two children Neal and Bobby have returned to their home on Barrett avenue. They were accompanied by Mr. and Mrs. John Toffoli.

Civic Center Club Postpones Meeting

The Civic Center club has postponed its meeting until October 15, it was announced yesterday. The meetings are scheduled to be held the first and third Wednesday's of each month.

LADIES AID WILL HOLD MEET SOON

Mrs. Jenny Brown, president of the Ladies General Aid of the Wesley Methodist church announces that there will be no pot-luck luncheon at the meeting tomorrow. The society will meet for a regular business session in the church hall at 2 o'clock.

In the evening there will be a pot-luck dinner at 6:30 followed by a social time.

Herbert Bill Entertains With Party

Herbert Bill, Jr., was the host recently to a number of his little friends who gathered at the home of his parents on Sanford avenue to celebrate his sixth birthday anniversary.

Those who were awarded prizes during the afternoon of games were Francis Enright, Jean Spagnoli, John Enright and Edeline Winters.

Festoons of pink and green decorate dihe pretty table at which refreshments were served. The centerpiece was a gay sail boat filled with pink and green bon bons with paper caps.

The guests for the afternoon were: Georgine Winters, Jean Spagnoli, Edeline Winters, Anna Soito Patricia Bill, John and Francis Enright, Floyd Williams, Paul Soito, Donald Bill and Herbert Bill, Jr.

Mrs. Hamilton Hostess At Party Here

Mrs. R. B. Hamilton was the hostess to a group of her friends who gathered at the Hamilton home, 637 Forty-first street recently, in occasion of their fifteenth wedding anniversary.

Cards were enjoyed during the afternoon with prizes going to Mrs Harry Busby, Mrs. C. B. Forbes and Miss Emma Pearman.

The tables at which luncheon was served were made attractive with French marigolds.

Those attending were:

Mesdames Henry Morelli, Theodore Beck, C. B. Forbes, Theodore Hultberg, Curtis Patterson, J. A. Butler, Henry Maslin, Harry Busby, Carl Friesendorf and Miss Emma Pearman.

Mrs. Bradbury To Entertain Rosalea Club

Mrs. Bernice Bradbury will entertain members of the Rosalea 500 club at her home 2031 Rheem avenue Wednesday afternoon. A good attendance is requested.

Friendship Club Meets October 4

Saturday October 4 is the date set for the next meeting of the Friendship club, as announced by the president, Emery Booth. The meeting night was advanced from October 11 because of the Rebekah district meeting scheduled to take place in Pinole that evening. The entertainment for Saturday's session is being arranged by Miss Grace Curry, chairman.

Leonard Coles On Vacation Trip

A two week's vacation in northern California and Oregon will be enjoyed by Mr. and Mrs. Leonard Cole of Thirty-ninth street, who left yesterday on their tour. Much of their time will be spent in fishing and hunting in the Humboldt country.

We wash blankets in Lux

We give blankets the very safest care—we wash them in Lux.

Leading authorities agree that Lux is safest—keeps fabrics looking like new twice as long.

Why bother with the tiresome task of washing heavy blankets at home, when a phone call to us will relieve you of this trouble.

Include blankets in your next bundle, and see how soft and fluffy we return them.

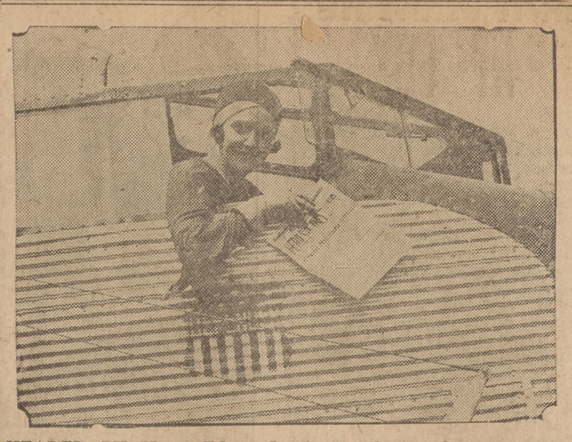
Aids Carnival



HEADED BY Mme. Edgar L. G. Prochnik, above, attractive wife of the Austrian minister to the United States, a committee of society and diplomatic ladies flew over Washington releasing cards announcing the opening of the annual army relief carnival at the War college.

St. Edmund's Guild Will Meet Today

Mrs. E. Adams and Mrs. H. Waddingham will be hostesses at today's meeting of the St. Edmund's guild. Several interesting matters are to be discussed at that time.

Onetah Group Plans Food Sale

Under the auspices of Onetah Council, Degree of Pocahontas, a food sale will be held Saturday morning in the Pon Honor store. Mrs. Clare Barry is in charge of the event.

MAPLE CAMP WILL VISIT AT OAKLAND

Final practice for the bi-county meet Wednesday in Oakland was held at last night's meeting of Maple Camp, Royal Neighbors of America in the Memorial hall. Mrs. Minnie Phillips, oracle, presided.

The Maple Camp will exemplify the ritualistic work Wednesday afternoon and members of the team have been hard at work the past months to perfect the degree.

Mrs. Pansy Spring was last night elected assistant marshal for the meet this year.

Plans were also started for a past oracle's night to be held Oct. 20 in the Memorial hall. At this time all past oracles of the Maple camp will be honored.

SAN PABLO P. T. A. TO MEET HERE

A business meeting of the San Pablo P. T. A. will be held in the school at 2:30 tomorrow afternoon and will be followed by a program and social hour.

During the business session, reports will be heard on student aid, sewing and the recent whist party. Activities for the future will also be discussed.

A short program will be given by pupils of the low second grade, and a social hour will follow.

All mothers of children attending the San Pablo school are invited to attend.

YEOMEN LODGE NAMES HEADS FOR YEAR

Witth installation scheduled for next Monday night, a complete list of new officers for Richmond Homestead of Yeomen was issued last night, after a meeting in the Brotherhood hall.

Officers who were elected a few weeks ago were Clyde Cook, honorable foreman; Roy Bryant, master of ceremonies; Mrs. Nellie Conn, chaplain and Bert Healy, master of accounts.

Cook appointed the following officers last night; Dan Carpenter, correspondent; Lillian Carpenter, Lady Rebekah; Eunice Coyer, Lady Rowena; Viola Zecker, overseer; Mary Sedlarick, watchman; Gilbert Hutchinson, sentinel; Fannne Carlin, guard and Lola Johnson, musician.

An invitation was extended to the Pittsburg Homestead to install its officers at the same time.

A committee was also appointed to arrange for the serving of refreshments next Monday as follows: Mrs. Eunice Coyer, chairman; Mrs. Mattie Creary, Mrs. Marjorie McCoy, Mrs. Margaret McKane, Mrs. Cook, and Mrs. Lenora Carpenter.

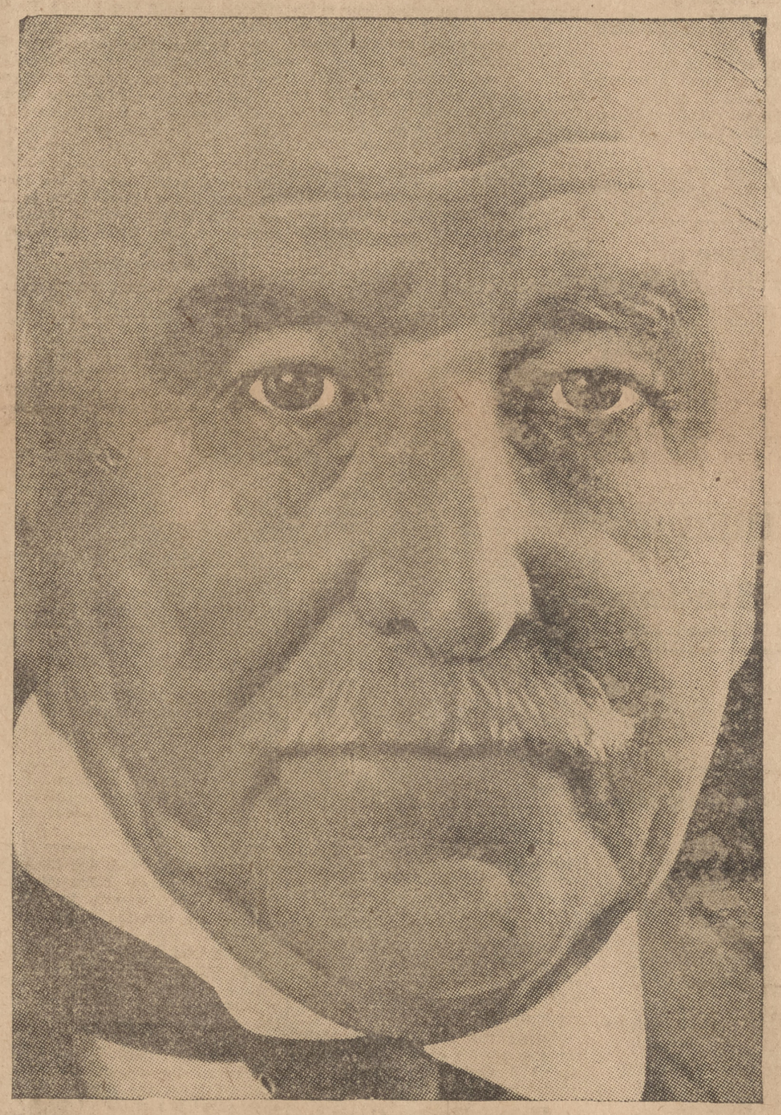
"AN ACCOMPLISHMENT WROUGHT IN THE FINEST TRADITIONS"



Says

WILLIAM L. WARD

President of Russell Burdsall & Ward Bolt and Nut Company

Director of the First National Bank of Portchester

"Patient research—that factor has characterized nearly every great scientific achievement, and the more public spirited the enterprise the more careful it is to insure successful results. Anyone who reads about your modern use of the Ultra Violet Ray in the 'Toasting' of the LUCKY STRIKE tobaccos cannot fail to recognize the long, patient research and experiment that must have preceded it. I regard your development as an accomplishment wrought in the finest traditions."

William Lloard

LUCKY STRIKE—the finest cigarette you ever smoked, made of the finest tobaccos—the Cream of the Crop—THEN—"IT'S TOASTED." Everyone knows that heat purifies and so TOASTING removes harmful irritants that cause throat irritation and coughing. No wonder 20,679 physicians have stated LUCKIES to be less irritating! Everyone knows that sunshine mellows—that's why TOASTING includes the use of the Ultra Violet Ray.

"It's toasted"

Your Throat Protection—against irritation—against cough

Consistent with its policy of laying the facts before the public, The American Tobacco Company has invited Mr. William L. Ward to review the reports of the distinguished men who have witnessed LUCKY STRIKE'S famous Toasting Process. The statement of Mr. Ward appears on this page.

COMEDY RIOT NOW SHOWING AT FOX

As a boy, Chico Marx, of the Four Marx Brothers, was a much cleverer musician than his brother Harpo.

Chico could take any old tin pan piano and make it talk, sing or week. Harpo could pick out only a couple of tunes.

But the two boys looked as much alike as twins. So Chico would go around and get a job on the strength of his playing. Then next day Harpo would show up and pound away on his limited repertoire until he was kicked out. He never lasted more than two days but by that time Chico would have several more jobs lined up.

Harpo finally became tired of this adventurous life and set himself to learn, without lessons how to play an old harp left to him by his grandmother. His technique was terrible and his tuning was worse, but somehow he began to draw music from the strings. No Marx Brothers' show is complete nowadays unless Harpo strums a half dozen tunes on his $12,000 instrument.

These two favorites of "Cocoanuts," together with Groucho and Zeppo, display their musical and comedy gifts along new lines in "Animal Crackers" Paramount talking picturization of their famous play, and the screen top-notcher, opening today at the Fox-California theater.

Also on the program is Eddie Cantor in a comedy scream entitled "Insurance."

Helen Kane Loses Temper

NEW YORK, Sept. 29. —UP— Helen Kane, boop-oop-a-doop singer, lost her temper in the hearing of the bankruptcy case in which she is involved today.

Miss Kane, being cross examined as to her relationship to Murray J. Posner, partner in a cloak and suit firm now in bankruptcy went so far as ta shout: "He's a liar!"

Considerable disturbance followed with two attorneys inviting each other into the streets. The uproar was finally quieted and the case proceeded in orderly fashion.

Committees For Legion Post Named

(Continued From Page 1)

entertainment, finance, general and Boy Scouts.

Each of these divisions have subdivisions as follows: Membership, old, new and attendance, welfare, sick, employment and funerals, community betterment, city planning and airport, Americanization, citizenship naturalization, holiday observance, historical publicity, and school awards, athletics, football, junior baseball, tennis, golf, junior rifle club, and basketball; entertainment: speaking, dri'l team, orchestra, glee club Armmistice Day ball and barbecue; finance: budget and auditing; general: county council, allied council, inter-post, auxiliary, conventions, emergency, Livermore Christmas committee and grievance.

The Boy Scout committee, according to Burt, will have no subdivisions.

Burt appointed H. J. Simons as chairman of the membership committee with Lambert Wierda as vice chairman; Everett Cohen, chairman of the Americanization committee, Dan Bradley chairman o fathletics with W. H. Outman as vice chairman; George Tandy chairman of the entertainment committee; and James T. Narbett chairman of the general committee with Dr. Lowell R. Sears vice-chairman.

During the meeting last night the group also considered the financial budget for the year.

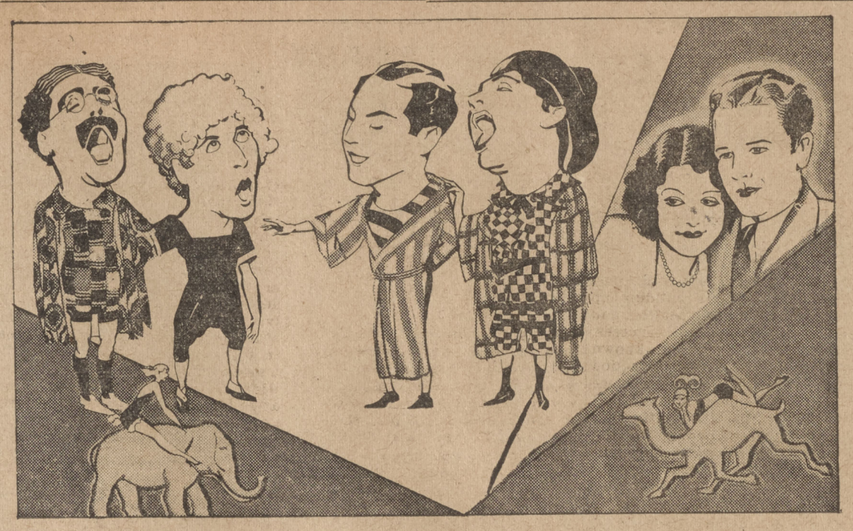
Animal Crackers



THE FOUR MARX Brothers are starred in "ANIMAL CRACKERS", which is now being shown at the Fox-California theater.

DEATH FOR 3 TIME LOSERS IS ASKED

SAN FRANCISCO, Sept. 29.—UP —"To heed a higher call to mercy," the state should quickly and painlessly kill all three-time vicious felons convicted within its bounds.

After 20 years of study and 15 years of practical contact with criminals, this conviction has been reached by a California state official, he hold the United Press today.

He is Ezra Decoto, member of the state railroad commission and for 12 years prosecuting attorney in charge of felonies in Alameda county. For a three-year term. Decoto was probation officer in the same county. In addition, he has played criminology as a hobby all of his professional life, and possesses probably the largest library on the subject to be found in a lay California home.

Tells of Work

Here are excerpts from the interview:

"In 20 years, I have seen many thousands of the so-called 'vicious criminal type.' I have seen several thousand 'researches' and 'surveys,' calculated to arrive at 'an understanding of the criminal physychology,' and in total failure.

"I have finally concluded that there is only one thing positively to be known about the hardened criminal; it is this: There is nothing of value to be learned.

New Laws

"He is just bad; try and find out why!

"I think vicious types of felony should be segregated by law from other crimes now classed alike, and a man caught for his third time in such an act dispatched at once.

"I hold no brief, mind you, for such elaborately barbarous and vindicative methods of capital punishment as hanging and electrocution. I think criminals of this type should be given their choice of as many merciful forms of death as science can devise.

Should Die

"But I sincerely believe they should be dispatched, and the public funds which ordinarily go toward their support in public institutions diverted toward the education and care of our crippled, sick, indigent and aged.

"By vicious felons, needless to say, I do not include violators of the interstate automobile act, the prohibition law, bad check laws and other legislation dealing with purely "moral" restriction. I refer to the armed burglar and stick-up man, the hit-run driver, such sabateurs as are responsible for dynamitings and bomb-throwings—in short, every felon who has stubbornly shown a blind, cynical disregard for the physical safety of law-abiding members of society.

"Needless to say, I would include murderers if I could conceive of a pretext for giving a first-degree killer his second chance, not even to consider a third.

Deplores Results

"As to the claims of scientists that there is much to be learned from observation of the incarcerated criminal, I have only this to say: Completely ignorant of such matters, I nevertheless deeply doubt if 'understanding' and 'sympathy' will ever produce results in dealing with the kind of conscienceless thug I have in mind. Consider the bitter irony of appealing to the 'gratitude' of a 'man' whose softer emotions have already thus manifested themselves!

"Sympathy? In an abstract way, I can manage a trace of it for the 'misguided youth' who goes cooly out prepared to kill. In an infinitely greater, practical way, I can muster a very great deal of sympathy for his victims and potential victims.

"I would like to see millions in former prison funds spent in the right kind of charity—the kind that begins at home among law-abiding persons, needy from causes beyond their control."

WATCH RICHMOND GROW-READ DETAILS IN RECORD-HERALD

Poet Kills Self In Apartment Of Girl

LOS ANGELES, Sept. 29.—UP —Robert Carroll Pew, who yearned for success as a poet rather than in the business world, drank poison and died in the apartment of a 22-year old Korean girl today because he could not sell his works.

The girl, Helen Kim, a graduate of the University of Southern California, collapsed. She said she did not know that he had mixed poison with his gin.

The girl said she loved Pew. Among the few verses he had succeeded in having published was "The Legend of the Tiare Flower."

It depicted the tragic love of a Tahiti maid for a white man, a "lovely maid with skin of delicate brown," who saw her lover sail away.

Pew was 35 years old. He was believed to have lived at Diamond Head, near Honolulu, with his mother. She was thought to be visiting in Oakland. In Pen's pocket was a pass on an eastern railroad made out to "Robert C. Pew, president of the Terminal Railroad."

Police were tracing the connection.

Two Held On Theft Charges

MARTINEZ, Sept. 29.—Two Oakland men are being held in the county jail today on charges that they entered an unoccupied hotel in San Pablo and removed a quantity of hardware.

The two are Herman Weiss, 68, Oakland junk dealer and Manuel Silva, 48, of Oakland.

The were arrested on the company of J. P. Pellow of San Pablo.

Robbery Clue In Double Murder

STOCKTON, Sept. 29.—UP—A theory that robbery was the motive for the killing of R. L. Morris, 46, and that the bandit killed Morris' companion, Miss Sophie Stetz, 19, after attacking her, was advanced by authorities tonight.

The bodies of Morris, father of three children, and Miss Stetz, night school student here, were found near here today by V. Fugazzi, an employe of the city pumping works.

Morris was sitting in his automobile, a bullet wound in his abdomen. Miss Stetz, her clothing torn, was lying in a field near the road. She had been cut across the throat and beaten. Morris' purse had been emptied.

Few Flappers Left In School, Savant Says

PULLMAN, Wash.—The flapper type of coed is as rare as the dodo bird, according to Stanley A. Smith head of the department of architectural engineering at Washington State College.

In the seven years that he has handled classes at the college, he has encountered so many home-loving, home-planning young women that he has had to turn them away, he declared.

"This certainly is an indication that the typical coed is not the flapper type," he said, "but rather a serious minded young woman who is looking ahead to the time when she has finished school, is married and has a home of her own.

"It is not at all unusual for a member of the class to have specific plans to carry out when she enrolls in the course. Sometimes she even comes for consultation outside of class with "the boy friend" and together they plan the home that will be theirs when school days are over."

Residence architecture, a course dealing with the planning, decorating and designing of small homes is exceptionally popular with coeds. It has been necessary to limit the course to uperclass women, due to lack of facilities to handle all who attempt to enroll. More than 100 attend the class each semester.

Cat Finds Owners After Two Years

TULSA, Okla.—Two years ago when Mary Elizabeth 8, and Peggy Jane Welch, 5, went on their vacation they left their cat behind. When they returned the cat had disappeared. After two year's absence the feline found the family again recently and is now at home. The Welch's had moved from the original residence in the meantime but the cat found them.

Woman Drops Baby From Show Balcony

OSAKA, Japan.—UP—Excited by the acting of Ganjiro, noted classical actor, in the Naka theater, a mother sitting in an upper balcony dropped her child on the heads of people below. The actor, unmoved, continued his lines despite a near panic in the theater.

Zonite

For pyorrhea

For prevention against gum infections, use Zonite, the new powerful antiseptic. Also guards against colds, coughs and more serious diseases of nose and throat.

NORTHCOTT TO BE HANGED THURSDAY

SAN QUENTIN PRISON, Sept. 29.—UP—In less than 24 hours Gordon Stewart Northcott, convicted for the murder of several small boys on his ranch in Riverside county, will be taken to the dreaded "death cell" of this prison which adjoins the execution chambers, but he was calm and quiet tonight.

Northcott is to be hanged Thursday morning unless there is unexpected intervention by some high authority.

Following prison procedure he will be given opportunity to have farewell conferences with his mother and father tomorrow. He may also receive Mrs. Christine Collings, mother of one of the boys he has been accused of killing.

Then shortly after five o'clock he will be taken from "death row" where he has been for more than a year, will be taken by guards through the prison yard, and will climb to the third floor of an old red brick building to be in solitary confinement, except for the company of a guard and a minister, the Rev. Larry Newcent.

Northcott talked for 30 minutes today with his mother, Mrs. Louise Northcott, who pleaded guilty to the murder of Collings' son, Walter, 11, and is serving a life term here.

"If they kill Gordon, I want them to kill me, too," Mrs. Northcott said, "as God is my witness, Gordon is not guilty."

Mrs. Northcott had repeatedly repudiated her confession since coming here.

"While I was sick with the 'flu' they told me the only way to save Gordon was to plead guilty," she claimed. "I never killed the boy."

RIPON—J. T. Shipley purchased local telephone system from G. F. Green.

LEGAL NOTICES

NOTICE OF SALE OF REAL ESTATE

IN THE SUPERIOR COURT OF THE STATE OF CALIFORNIA, IN AND FOR THE CITY AND COUNTY OF SAN FRANCISCO.

In the Matter of the Estate of ELLEN OWENS, also called NELLIE OWENS, Deceased. No. 30918. Dept. 9.

"CHRISTIAN SCIENCE:-ITS VALUE TO HUMANITY"

LARGE CROWD HEARS W. W. PORTER, C. S. B.

At the Lincoln auditorium Sunday afternoon, a lecture on Christian Science, entitled "Christian Science: Its Value to Humanity" was given before a large and appreciative audience by Mr. William W. Porter, C. S. B. of New York, N. Y., member of the Board ofLectureship of The Mother Church, The First Church of Christ, Scientist, in Boston, Mass.

The lecturer was introduced by Mrs. Christine Christensen, member of the church, who spoke as follows:

Friends:

In behalf of First Church of Christ Scientist Richmond, I bid you welcome. When I first became interested in Christian Science, one of the first thoughts that came to me was, "He that over cometh." I was wondering if I had anything to overcome; I soon found that I had, but the most beautiful part of it all was, I found out how to overcome it. I have been healed of many physical ailments and helped in financial difficulties. In short, Christian Science has been my help in every way.

I now take great pleasure in introducing to you, a member of the Board of Lectureship of The Mother Church, The First Church of Christ, Scientist in Boston, Mass. Mr. William Porter, who will now address you.

The lecturer then spoke as follows:

DISCOVERER AND FOUNDER

A little over half a century ago an unusual woman appeared upon the highway of human endeavor. She saw about her huminity's sins, sufferings, and sorrows. A night of terror seemed about to engulf her.

She turned away from earth and looked towards heaven and God. Nothing was important to her but God. The outlook changed and gave brighter promise. Through the materiality of earth the woman saw a beckoning path, and into into this path she resolutely turned her footsteps. Like the Patriarch of old the woman looked for a city that hath foundations, whose builder and maker is God. As she journeyed her vision grew, and she saw exceedingly near those many mansions which are spoken of by the Master in the fourteenth chapter of the Gospel of John; she learned that these mansions are mansions of health, mansions of happiness, mansions of peace and prosperity; she found her own confidence and courage ever mounting to meet opportunity; there came to her unbounded and unexpected ability and success, and a higher sense of Life as God.

Mindful of humanity's sufferings, sins, and sorrows, the woman began to mark the path on which she journeyed, so that others might not lose the way. Multitudes of men, women, and children have since found the path which the woman discovered, and have followed the waymarks which she established for their guidance from mortal sense to the harmony of immortal being—to Life as God.

This woman was the Discoverer and Founder of Christian Science, Mary Baker Eddy, the author of the Christian Science textbook, "Science and Health with Key to the Scriptures." In the year 1866 Mrs. Eddy was brought back almost from the grave through her spiritual understanding and pure desire. Her expectancy of good pushed back the dread shadows of ignorance, fear, and superstition, and she was restored to a life of usefulness and goodness unparalleled in the annals of Christian history. Following her remarkable healing and at an age when most women of her day fell under the mesmeric suggestion of declining years, Mrs. Eddy launched forth upon an undertaking which was destined to become her crowning life-work, the demonstration of Christian Science, and its presentation in such a way that humanity could not fail to understand its meanings and receive its benefits.

Mrs. Eddy tells us in her writings that in the demonstration and establishment of Christian Science she had no other guide than the Bible. This was her only textbook; and "Science and Health with Key to the Scriptures" testifies to the consistent fidelity with which the Discoverer and Founder of Christian Science maintained the relationship of her thought to the spiritually illuminated pages of this Book of books. In view of this relationship one is not surprised to find that in due time, and by a proper By-Law in the Manual of The Mother Church, Mrs. Eddie ordained the Bible and "Science and Health with Key to the Scriptures" for all time and in all lands as the Christian Science pastor.

GOD

In the orderly process of arriving at the correct statement of the problem of being, one finds himself confronted with the question, What is God? We are told by Mrs. Eddy that one of the chief difficulties encountered in her early writings was that of finding words or language which would adequately express the spiritual ideas which she sought to impart. The same difficulty still exists, but in a lesser degree, because today the language of Christian Science is more widely disseminated and better understood. Today when one refers to God a generous part of one's listeners is found to be more or less in harmony with the definition in the Christian Science textbook (p. 465), namely, that "God is incorporeal, divine, supreme, infinite Mind, Spirit, Soul, Principle, Life, Truth, Love."

In the seventeenth chapter of the Gospel of John we find these impressive words of Jesus: "And this is life eternal, that they might know thee the only true God, and Jesus Christ, whom thou hast sent." The Master laid great emphasis upon the necessity of knowing God. It is perfectly clear that mere belief is insufficient. We must understand God in order to experience confidence, reliance, and trust in the divine nature.

The discords of humanity accounted as sin, sickness, and disintegration are inconsistent with the perfection of creative Cause. In Science creation reflects the perfection of the creative Cause from which it springs. SSin, sickness, and death are inconsistent with this idea of creation. Therefore these evi's cannot be considered as the outgrowth of a perfect Creator.

In the ordinary processes of belief humanity has been led to assume that upon the completion of His creation God left this creation to shift for itself without guidance, and without preservation from sin, sickness, and dissolution! But this sense of creator is inconsistent with the idea of perfect creation. The creative Cause—God—because of its constant imparting nature must be the Preserver as well as the Creator of that which is created. How much stronger would be our trust and assurance in the hour of need did we but grasp a little more simply the nature of God as the Preserver of all.

There is cause for great rejoicing right here, however, because that through the demonstration of Christian Science there is building up universally a quiet, inescapable conviction that the divine Life and Love called God in reality not only creates but preserves all that He brings into manifestation.

Christian Science shows sin, sickness, and death to be the effect of an imperfect, incomplete, and misleading sense of God implanted ignorantly in the consciousness of men. This imperfect and incomplete sense of creator reproduces itself in an imperfect and incomplete sense of created things.

Someone is going to say: Well, how has this mischievous and misleading sense been implanted in the consciousness of men? The answer is: Through ignorance and fear. Ignorance of God, and fear springing therefrom.

It may be asked: How can one gain a proper sense of the perfect Creator? And who shall describe the infinite God? The Scriptures are worthy of deep respect. We read in the book of Genesis: "So God created man in his own image, in the image of God created he him; male and female created he them." Here is a simple and direct statement of completeness which indicates the fatherhood and motherhood of God. Without the inclusion of this full nature in the Godhead the idea of Deity is imperfect and incomplete; and the sense of creation consequently is inadequate, discordant, and destructive.

By giving proper emphasis in her teachings to the motherhood of God, Mrs. Eddy has brought to human thought the recognition in Deity of those characteristics of wisdom, tenderness, and completeness which quiet humanity's fears and restore the hope and courage of men. In the opening line of the spiritual interpreation of the Lord's Prayer, given in the Christian Science textbook (p. 16), we read: "Our Father-Mother God, all-harmonious." Here is the thoughtful and prayful acknowledgement of one source or origin, and hence of the equality or kinship of all under the fatherhood and motherhood of God. Moreover, this recognition of the fatherhood and motherhood of God imbues thought with a larger idea of wholeness and a more perfect understanding of completeness, which dispel ignorance and fear, and impart health, happiness, and prosperity in the hour of human need. This is the way of righteousness, the ever-operating process of creation, in which the nothingness of mortal conceptions disappears and the harmonious realities of the divine Mind appear, demonstrating the omnipotence, love, and perfection of the one infinite Father-Mother God—the Preserver of all.

Mrs. Eddy writes in Science and Health (p. 170): "Spiritual causation is the one question to be considered, for more than all others spiritual causation relates to human progress."

In the Scriptures we read: "In the beginning was the Word, and the Word was with God, and the Word was God . . . . All things were made by him; and without him was not any thing made that was made." On page 465 of Science and Health Mrs. Eddy writes: "Principle and its idea is one, and this one is God, omnipotent, omniscient, and omnipresent Being, and His reflection is man and the universe."

What is this, without which not anything was made that was made? Bearing inremembrance that creation must follow the Creator, and that at no point can it depart from its true genesis, and bearing in mind that causation must include the quality of immortal Mind, the creative Principle, it must be seen that that without which not anything was made that was made, is the Word of God, which manifests and expresses the creative nature; and that man is the image or idea of the creative Mind. Hence all that exists in the realm of the real exists as the impartation of Life or God, and moves as idea or image, forever expressing the nature of the eternal Principle, Love, in obedience to the command: "Be fruitful, and multiply, and replenish the earth, and subdue it: and have dominion."

HEALING

The effect of Christian Science is plainly seen in the building up and preservation of health and strength, happiness and success, wherever this Science is known and practiced. This declaration should not be accepted as a mere theoretical statement of doctrinal belief. It records a specific fact demonstrated and proved in the lives of men and women throughout the world. An unusual admission of this is found in the following incident: A number of years ago a Christian Scientist was being interviewed by the representative of a large insurance company who, at the close of the interview, said to the Christian Scientist, "Will you pardon me if I ask you an unusual question? Are there any rules in your organization which require a definite standard of physical perfection among those who represent the organization?" Being assured by the Christian Scientist that there were no such rules or requirements, the examiner continued and said: "I was impelled to ask this question because I have made a number of examinations under similar circumstances, and in each of these cases I found such uniformly perfect physical conditions that I concluded there must be a rule in the Christian Science organization which required a certain definite physical perfection among its representatives."

Christian Science demonstrates the everyday value of spiritual ideas in the building up of health and prosperity as well as of holiness. The incident just recorded proves this to be true. The circumstance related may be accepted as a twentieth-century demonstration of another incident which is recorded in the first chapter of the book of Daniel, wherein Daniel and three companions who desired not to defile themselves with the king's meat and wine were permitted for ten days to subsist on pulse, a leguminous plant of the order of the pea or bean. According to the Scripture it was found after ten days that "their countenances appeared fairer and fatter in flesh than all the children which did eat the portion of the king's meat." Daniel and his companions had learned that sustenance and strength were neither in the king's meat nor in the pulse. They had learned something of the great truth which was later voiced in the words of Jesus: "Man shall not live by bread alone, but by every word that proceedeth out of the mouth of God"—by every idea that proceedeth from divine Life or Mind shall man live.

Christian Science shows that Spirit and spiritual ideas are not vague, intangible, or erratic, but that these are positive, certain, and real. Indeed, unless spiritual values and power may be apprehended and enjoyed in the everyday walks of life, then spiritual things have no significance with respect to daily existence. Christian Science declares that Spirit and its manifestations constitute reality. This declaration is without value, however, unless it can be proved in the daily experience of men and women. Christian Science does this. It proves the value and reality of Spirit and of spiritual ideas, until the individual comes gradually and surely into the expectancy and enjoyment of health, prosperity, and the understanding of good. The Christian Scientist is learning the meaning of this: That man lives " by every word that proceedeth out of the mouth of God." He is learning that man is strengthened, fed, nourished, and preserved by the spiritual idea of Life, Truth, and Love, unfolding the nature and substance of immortal man.

We read in the Scriptures: "For as the Father hath life in himself; so hath he given to the Son to have life in himself." As Principle, God, the Father, is Life and imparts life, so the spiritual idea or image of Life, God, likewise reflects and imparts life. Here is seen the mode of healing in Christian Science wherein the true idea of God as preserver dispels sin, sickness, and death, and causes health, happiness, and prosperity to appear.

The older medical theories which deal with matter as the cause of disease are being rapidly abandoned by the better class of medical practitioners, and the recognition is obtaining that disease and its cause are mental. Thus we have astute schools of medicine gravely announcing in the year 1929 that disease and its cause are mental,—as though this were a recent discovery,—whereas it is a fact which Christian Science has set forth consistently for more than fifty years.

Christian Science denies and repudiates the psychology of the human mind as a healing factor. The mortal mind which produces disease cannot be the healer of disease. In Christian Science all healing power is understood to belong to God, and it accompanies always the divine or spiritual idea of God. It is the Christian Scientist's confidence and trust, born of experience and understanding, which enable him, from the heights where God is revealed in His eternal likeness, man, to look with compassion on the sick and the sinning who suffer from a sense of existence apart from God—as illusion, without identity, reality, or power.

We learn in Christian Science that as human thought is held in right relation to the divine Mind or God, the effect is that the spiritual idea of God imbues thought with divine impartations, or true consciousness. This true consciousness expresses the idea of Life or God as diivne idea—not person—in fruitfulness, in multiplying, in replenishing, in subduing, and in having dominion.

CHRIST JESUS

Jesus of Nazareth presented to thought, ideas which were radical and revolutionary to the day in which he lived. The human voice which enunciated those ideals is no longer heard, but the spiritual idea which was manifested by Jesus could not be silenced or subdued, because it moved and ever moves in the consciousness of men, demonstrating the capacity and instinct to grow and to multiply in obedience to the command of God—the imparting nature of Life and Love.

The teachings of Jesus of Nazareth contain nothing of human opinion based on material knowledge. From his earliest days a personal sense of things meant nothing to him. He devoted no time to material theories. His interest first, last, and always was in the spiritual Cause, or God, and in creation which expressed clearly the divine nature. His emphasis, based on logical premise and conclusion, points to sureness of thought — a sureness which can rest only on clear perception of true being. His sureness and directness of speech were marveled at by those who saw and heard him. His words testify to the clear, scientific nature of his thought, between which and the Father stood no barrier. In the mind of Christ Jesus there was nothing of a transient personality between the origin of his being and the idea which he expressed. The origin of being was inseparable from the idea which he expressed: "I and my Father are one."

Of Christ Jesus, Mrs. Eddy nas written in Science and Health (p. 313): "Jesus of Nazareth was the most scientific man that ever trod the globe. He plunged beneath the material surface of things, and found the spiritual cause." As one studies the teachings of Jesus in the light which Christian Science throws upon them, their clear, scientific nature and basis compel one to stand in reverence and awe before their dignity, exactness, and tenderness.

It is not surprising that Mary Baker Eddy, a true follower of Christ Jesus, should have designated Jesus of Nazareth as "the most scientific man that ever trod the globe," thus revealing the nature, the true divinity, of him whose nobility, grandeur, and humaniety mark the threshold of the Christian era.

CORRECTION OF THOUGHT

One may wish to inquire here concerning existence as it appears, and the concept of man that is present to human consciousness. Whatever it is, or is not, all will agree that it is far from satisfying; indeed, that it is altogether inadequate.

Christian Science shows that mortal man is the likeness of mortal mind. He is born, thinks, speaks, sleeps, eats, walks, is a success or failure, is sick, is well, and finally becomes dead, accordingly as mortal mind declares. And this goes on over and over and over again; mortal man traveling in the routine of a circle, obeying the suggestions of mortal mind, and looking upon it all as truly authentic and dependable.

Military barracks generally observe the custom of firing a gun to announce the time of sunset. At a certain barracks a visitor inquired of the officer in charge how he secured the correct time by which to fire the gun. "Oh," said the officer, "I check my time with the watchmaker in the city." The visitor had occasion to call at the watchmaker's shop, when he asked the watchmaker how he obtained the correct time for his chronometer. "Why," said the jeweler, "I get the accurate time each day from the sunset gun at the barracks." And there may be seen a fairly good illustration of mortal man and mortal existence.

Thus controlled, human beings are not free moral agents or thinking creatures; they are governed by the mesmeric suggestions of mortal mind, somewhat after the manner in which a person is controlled under hypnotic suggestion. The hypnotic operator may tell his subject to take a fishing pole and to go fishing. He tells him to pull in the line, to take the fish off the line, and to put the fish in the basket. The man acted upon moves in accordance with the suggestions given to him. He believes that he has just caught a fish, and that he has placed the fish in the basket. Of course an onlooker recognizes the whole proceedings as hypnotic rigmarole. The onlooker would not think of asking the fisherman if the fish is real! To the man looking on, the whole thing is illusion. There is no fish there! But to the hypnotic state of consciousness the fish seems very real, true, and present.

The operator might go a step further and command the fisherman to take the fish home with him, to dress it and cook it, and to eat it and be nourished thereby. These directions the fisherman will proceed mentally to carry out. But there will be no reality in any of it, and the fisherman will find trouble and sorrow along the way because trouble and sorrow proceed from the belief that the unreal is the real.

As a further supposition,—and it is not necessary for the purpose of the illustration to figure out a plan to bring it about,—suppose that all the people of the world were brought under this same hypnotic belief of fishing—throwing the line, pulling out the fish, putting it in the basket, taking it home, cooking, eating, and being nourished thereby. In this circumstance the whole affair would not be looked upon as illusion at all, but as a definite actuality and perfectly natural, because the same state of consciousness would control the belief of all. The entire world would be living under an illusion of hypnotic belief! And any person who questioned the genuineness of the fish would be thought to be queer! All of which illustrates something of mortal mind organized into mortal man or mortal existence, an existence which has no more relation to the real man and real existence than has the fish which the hypnotized person believed he caught to the onlooker.

Now, what is this error-man? Where does this error-man come from? These questions originate in mortal consciousness, a state of consciousness which accepts the error-man, or hypnotic fish, as real, and consequently which sees a mortal or erroneous sense of man as real and true, and says: This is what I see. Now, where did it come from? The nature of error or illusion does not permit of explanation. You cannot explain the fish which the hypnotized person believes he caught because there is nothing there to explain.

MAN

As Christian Science has lifted up thought concerning the nature of God, so this Science is reforming thought with respect to the nature of man. But how does it come that man has the capacity to err? Whence do mortals get the capacity to hypnotize and to be hypnotized? Here, again, these questions are prompted by mortal consciousness which does not see man, but sees a false sense which it calls man.

Mortals may have the capacity to deceive and to be deceived, to sin, to be sick, and to die. But man is the image and likeness of Spirit, Mind, God, and since God, Spirit, Mind, is not material, man is not material, but is always the image, idea of Mind, or God. Hence man, the image of Life, Mind, God, has not the capacity to sin, to be sick, or to die. And this only is man!

The effect of Christian Science is to take away illusions of mortal sense, the misleading beliefs about God and man and the universe. In dispelling these false beliefs, however, Christian Science does not destroy anything that is needful and helpful and desirable to human beings. In dispelling the false sense of fish, in our illustration, one would not set out deliberately to destroy the fisherman. Jesus declared, "I am come that they might have life, and that they might have it more abundantly." This is exactly what Christian Science is bringing to humanity—more and more of Life and Mind, more and more of God, and consequently more and more of man.

One may say: This is beautiful, and it all follows the logic of Mind, but it is rather indefinite; we must have something that is more tangible to look upon as man. Perhaps if we go a little further with our thought in the examination of the so-called physical structure, it may be helpful as lifting up in thought the nature of the real man. So simple a thing as a grain of wheat will serve to illustrate a point in our thinking. Entering some well-equipped research laboratory we say to the physicist in charge: "Sir, we have here some grains of wheat. We desire that you shall produce some kernels of wheat exactly like these we have here, in components, structure, color, shape." In due time we receive from the laboratory the wheat product of the physicist.

The wheat grains taken from the field and those received from the laboratory we plant in the earth and await results. In due time the kernels of wheat taken from the field begin to spring upward. They grow—mature. Lo, each grain of wheat gathered from the field has multiplied many times! The laboratory grains reveal no evidence of fruitfulness. The seeds were barren. Everything that the physicist could find in the field seeds has been reproduced in the laboratory seeds. But the latter do not grow. Something in the genesis of the field seed-structure has not been supplied by the laboratory.

We read in the first chapter of the Gospel of John, concerning the Word and God, that "All things were made by him; and without him was not any thing made that was made." The genesis of Life and Love, of Spirit, Mind, God, is lacking in the material product of the laboratory. It does not possess the instinct to grow.

Whilst Christian Science emphasizes clearly that Life, God, is not in matter, hence is not in the grain of material wheat, it also shows with equal clearness that neither corporeality nor material evolution can produce that which defines and classifies, and which multiplies, replenishes, subdues, and has dominion. This classification and fruitfulness, seen everywhere is constant evidence of the primal and all-inclusive spiritual origin and control of man and the universe. When man is seen and understood in the light of his Maker thought will no longer turn to the laboratory, to the flesh, or to matter, for the manifestation of Life, but this manifestation will appear as the unfoldment of the Word, the idea of the imparting Principle, Love, —revealing the true genesis of being in everlasting fruitfulness, and dominion over so-called material beliefs. God is the intelligent, imparting Life or nature who endows all ideas—man—with distinct characteristics and expressive powers. How can man be sick? How can the business of man fail?

PRAYER

The healing work wrought by Chirstian Science is the effect of prayer. By this is not meant that a petition is offered asking God to do something for man. The Christian Scientist knows that the nature of man as God's creation includes completeness, and that man possesses all good. Mrs. Eddy defines prayer as desire. On page 1 of Science and Health she has written, "Desire is prayer; and no loss can occur from trusting God with our desires, that they may be moulded and exalted before they take form in words and in deeds."

Consciousness which reflects the true understanding of God with authority and conviction is the result of prayer or pure desire; and this state of consciousness is essential to the healing of the sick and the sinning in Christian Science. In the true genesis of existence it is seen that prayer is not a mere petition asking God to make a mortal perfect, but that it is in reality a state of consciousness, the result of pure desire and of the conviction or understanding that man is perfect, immortal, harmonious, now and always. This conclusion is scientific and Christian, and it rests upon the nature of divine causation, and upon the perfect and unimpeachable impartations of Life and Love, the living God.

To desire and to maintain the spiritual consciousness which heals the sick and the sinning is constant, living prayer.

THE WIDENING HORIZON

Christian Scientists do not maintain a "holier than thou" attitude with respect to other systems of religion and healing. They do, however, endeavor to attain and maintain unadulterated the standard of divine metaphysics or Christian healing. This procedure is Christian and scientific, and it has alerady advanced the welfare of humanity beyond measure.

For more than half a century Christian Science has been healing the sick and the sinning in demonstration of the power of God to dispel the ills and the shortcomings of humanity. Today the fact of Christian Science healing is recognized and accepted by individua's and by sects in many lands.

After six years of exhaustive investigation the fundamental truth of Christian healing has been endorsed by a Joint Commission of the Protestant Episcopal church in a report which urges "the deepening of the spiritual life of the church that comes through the growing recognition of the healing power of God.' The report of the Commission says that "Christian healing has passed beyond the stage of experiment, and its value cannot be questioned. Spiritual healing is no longer the hope of the few, but the belief and practice of a large and rapidly increasing number of persons."

Looking forward to this day the Discoverer and Founder of Christian Science many years ago wrote these prophetic lines, which appear in her writing, "Pulpit and Press" (p. 22): "If the lives of Christian Scientists attest their fidelity to Truth, I predict that in the twentieth century every Christian church in our land, and a few in far-off lands, will approximate the understanding of Christian Science sufficiently to heal the sick in his name."

Christian Science has always occupied a place far in advance of the oncoming ranks of human thought; and its work has been to prepare thought for the unfoldments of inexhaustible Mind, life, and Love.

A great work confronts Christian Scientists to-day in demonstrating the further unfoldment of this Science to mankind. Orthodox religion and medicine are already taking down the bars of their fences and entering the fields where Christian Science has brought forth harvests of health and good to the children of men.

The Christian Scientist cannot stand still because of the imparting nature of the spiritual idea of God which demands expression. The real student of Christian Science realizes that because of the infinite nature of this Science it is only comprehended in infinite unfoldment. On page 367 of Science and Health Mrs. Eddy again writes, "I long to see the consummation of my hope, namely, the student's higher attainments in his line of light." Jesus declared, "He that believeth on me, the works that I do shall he do also; and greater works than these shall he do; because I go unto my Father."

As further indicating his recognition of the forever unfoldment of Life and Mind to man these words of Jesus are recorded in the Gospel of John: "In my Father's house are many mansions: if it were not so, I would have told you. I go to prepare a place for you."

He recognized that his place was beyond the horizon of matter, creed, and ritualism, and that his work lay in the direction of preparing human thought to see and to accept the more glorious and delectable states of consciousness which are forever being revealed by the spiritual idea of God. "In my Father's house are many mansions,"—many beautiful, many wonderful ideas, in which to live, states of consciousness revealing spiritual values and power,—mansions of health, mansions of happiness, mansions of peace and prosperity; and, "if it were not so, I would have told you." In other words, if the treasures of life—health, happiness, peace, and prosperity—are to be found in matter or in a material sense of things, I would have told you! What an endless debt of gratitude do we owe to the loving Jesus! How well he fulfilled his mission to prepare consciousness for the further unfoldments of infinite Mind and divine Love is witnessed in our own day; the doors of the mansions have been opened by Christian Science. Mrs. Eddy has written in Science and Health (p. 99): "Truth has furnished the key to the kingdom, and with this key Christian Science has opened the door of the human understanding. None may pick the lock nor enter by some other door." Christian Science shows that these mansions are not the air castles of mortal belief, that they are not mere figures of speech, but states of true consciousness. If one would enter and enjoy these higher states of consciousness he has but to turn away from his impoverished beliefs of mortal heredity called self, and he will begin straightway to find the true inheritance of Mind, or God, which is revealed in man. Remember the word which the Master uses to express his meaning—"mansions"! Not the mean, dilapidated huts of mortal sense, not the hovel-belief of sickness, not the hovel-belief of false appetites, nor the decadent beliefs of lack, discouragement, and failure — but mansions! Mansions of health; mansions of happiness; mansions of confidence, peace, and prosperity—a city of mansions! A CITY THAT HATH FOUNDATIONS WHOSE BUILDER AND MAKER IS GOD.

Tear Gas Used To Clear Mob

HUNTSVILLE, Ala., Sept. 29.—UP—National guardsmen were forced to use tear gas bombs tonight to disperse a crowd of 1500 which gathered near the Madison county jail where G. H. Henderson, negro, is held for safe keeping.

The crowd began throwing rocks at the guardsmen, summoned when the city was placed under martial law after mob violence was threatened. The fire department played a hose within a block of the jail and thus kept the crowd back.

Meanwhile officers announced they were satisfied the negro was innocent of any connection in the shooting of W. E. Ross, killed in his home by a negro burglar last night.

Congress Refuses Resignation Of Ecuador Leader

GUAYAQUIL, Ecuador, Sept. 29.—UP—An official announcement from Quito tonight said that President Isidro Ayora presented his resignation to congress after a day of tension in the capital.

Congress in full session, however, refused almost unanimously to accept the resignation. Senator Coloma, Maldonado and Leiva, the latter a socialist, alone dissented.

Congress ordered the resignation filed and immediately designated a committee of deputies to call on Ayora and inform him that the chambers had offered him an unconditional vote of confidence.

The report said military leaders in Quito opposed the president's resignation, insisting he remain in office. He was declared however to have refused their counsel.

Winter Starts In Middle West

CHICAGO, Sept. 29.—UP—Winter poked a frosty finger at the midwest tonight, sending temperatures down almost to freezing.

Pedestrians wore overcoats, householders coaled their furnaces and motorists experienced their first difficulty of the year with balky carburetors. The weather bureau said temperatures would almost touch freezing before morning.

First Snow Fall At Yosemite

YOSEMITE, Sept. 29.—UP—Ushering in the winter season at the world famous Yosemite valley, eight inches of snow fell in Tioga pass today. Fall visitors at the valley resorts were enthusiastic about the prospect of early enjoyment of winter sports which ordinarily come much later in the year.

FABLES FOR THE FAIR

By MARGUERITE MOORES MARSHALL

Copyright Press Publishing Company (New York World) 1930

Step-Nieces of Uncle Sam

ONCE upon a time there was a girl who was an unusually patriotic person.

Her father and her grandfather and her great-grandfather had all served their country in time of war.

MARGUERITE MOORES MARSHALL

And, if she had been a boy, she probably would have entered the army or navy.

Since she was a girl and since, despite her military forebears,

She hoped frankly that her Uncle Sam would avoid future wars.

It seemed to her that it would be an excellent idea

To serve her country peacefully—

To prepare herself for a job in the government service.

And, when she had honestly earned her appointment,

To do her work as conscientiously and devotedly as possible,

And so to advance to a post

Where her brains, her character, her willingness to apply herself

Would be of real benefit to her country,

As well as to herself.

She thought she wasn't suffering from any delusion—

She had no idea of entering government service

With the idea of making a fortune or a famous name—

But, since she had to support herself,

She did hope to make a decent living in a fair field, with no favor.

But with even-handed justice from Uncle Sam to his patriotic niece.

So, first of all, she studied hard

With the idea of passing really creditably

One of the examinations given by the Federal Executive Civil Service—

She was cheered by the knowledge

That, thanks to a protest by the Women's Bureau at Washington, in 1919,

The Civil Service Commission had passed a ruling

Which opened all examinations alike to men and women.

She took the examination, finally, for the job on which she had set her heart.

She passed her examination with a mark between 80 and 90;

She happened to know some of the men who were taking the same test at the same time.

And what was her amazement to find out

That first one and then another of these male competitors

Who had earned a rating only between 60 and 70 in the registers—

Had been called for, by bureau heads, in preference to herself with her distinctly higher rating!

On further investigation she found that this sex discrimination was far from unusual—

That indeed the Civil Service Commission had been making unofficial protests about it

For more than twenty years.

Well, finally, the patriotic young woman got her appointment

At a modest—a decidedly modest—salary.

As a beginner, she was ready and willing to work for little.

But as time went on she began to find out things

Not only about her salary but about the pay received by most women in government service,

And about the extremely small number of promotions and important posts allotted to them.

She listened to a speech by Grace Abbott, head of the Children's Bureau,

In which Miss Abbott summarized the mere handful of women whom Uncle Sam has honored with posts of importance—

Miss Abbott herself receives $7,500 a year,

Miss Jessie Dell, civil service commissioner, receives $9,000;

Miss Genevieve R. Cline, associate justice of the United States Customs Court in New York,

And Miss Annabel Matthews, member of the United States Board of Tax Appeals at Washington, each draw $10,000—

But only six women of all the administrative and supervisory officeholders

In the executive and judicial departments of the government

Receive between $5,000 and $7,000,

And only twelve are paid from $5,000 to $9,000 a year.

"If we try to evaluate the present position of women

"In the executive branch of the government," summed up Miss Abbott,

"Not by total numbers employed

"But by the number holding administrative or important scientific and professional positions,

"We must, I think, say that women have had little or no recognition

"In the administrative branch of our federal government."

Then our patriotic young woman in government service

Read a most illuminating article,

Uncle Sam and the Ladies,

Contributed by Winifred Mallon to the Independent Woman.

The young woman's devotion to the work she was doing for Uncle Sam was of course intensified

By such data as the following, on the way he treats his nieces—

Or wouldn't it be more accurate to call them his step-nieces?

In a survey of fourteen government establishments, made by the Women's Bureau—

Establishments employing 15,996 men and 15,777 women, an approximately equal number of either sex—

Only 18 per cent of the women, compared with 51.8 per cent of the men,

Were receiving salaries of $1,860 or more—

That is, approximately one-half of the men and not quite one-sixth of the women

Receive $1,860 or more a year.

Fifteen per cent of the women and 61.5 per cent of the men

Were paid $2,400 or more per year.

Only thirty-five women receive $3,600 and more.

And only ten, of the thousands of women included, receive as much as $5,200.

Altogether, after fifty years during which women have been employed by Uncle Sam,

And out of a total of 587,605 men and women,

Less than 200 women of the 82,501 in all ranks of the service

Have managed to rise to positions ranked as "administrative" and "supervisory."

And of those now occupying such positions

Only twenty-seven are receiving salaries of and above $5,000.

Now, really, with all the proofs of woman's trained intelligence,

Of her executive ability, her conscientiousness, her business efficiency,

Is Uncle Sam justified in giving such a one-sided deal to his nieces,

And aren't they justified in feeling, as did our patriotic young woman,

That they are being treated like Cinderella-step-nieces?

Uncle Sam's nieces, since the passage of the Suffrage Amendment, are supposed to enjoy

Equal civil and political rights with Uncle Sam's nephews,

But this seems not to mean equal rights in jobs—

In getting them, in getting paid for them, in getting promoted to them—

All of which is something for Uncle Sam's ambitious step-nieces to remember!

The Shoe to Fit the Foot

Copyright Press Publishing Company (New York World) 1930

THERE was a time when a woman —almost any woman—would gladly crowd her No. 4 foot into a No. 3½ shoe, or a three if she found herself physically able to stand the discomfort, but that isn't so now. It's one of the sensible factors of women's emancipation that they put comfort first and looks afterward, though to give women their due they will strain a point to combine the two—to make it comfort and looks.

All of which shows all over again the perversity of things as they are, for statistics prove that the American feminine foot is gradually becoming larger, in which case you would think that it would be now that women would be trying to squeeze their fours into threes and a half. But note two interesting features in this connection—first, there are fewer No. 4's, for the average size footgear for American women is no longer four but five and a half, and the width has expanded from A to B, which is considerable expansion both in breadth and length. Secondly, the shoe shops report that there are any number of sixes and sevens called for, and even tens are not so rare.

Another interesting feature of the situation is that both women and the designers of their shoes do try to make their feet look smaller, but they take another and up-to-date way about it. The designers make it their problem and the shoe salesmen in the shops make it theirs, and so you are told that this design or that is expressly calculated to give your particular feet their correct, their best effect in shoes. They simply fit them in shoes of design that make the foot appear smaller.

The cut of the shoe, its material and its ornamentation are three ways to chic in modern footwear. A foot attached to fat ankles should have a high back, a slender but not too slender heel and a long, gradual but very direct slope to the vamp and the narrowest possible toe. What is called the strap is flattering to this foot. It is a fact that women with long feet are prone to want the longest of the long vamp shoes, which is obviously a mistake. Their cue is the well-rounded toe, but not the French toe, and a design that carries along the side from the middle of the toe to, but not beyond, the inner edge of the heel.

A mistake frequently made by women possessing small feet, say, size 2 or 2½, is to wear a shoe that makes an even smaller appearance, which takes the shoe out of all proportion. The small shoe should be as tailored-looking as possible, and however trimmed, its decoration should contribute unerringly to that effect.

A great deal depends in the illusory shaping of the foot through the cut of the top of the vamp and its trimming. For example, a broad band of a contrasting material with a graceful shallow-cut top curve gives a surprisingly graceful effect to a too thin foot, while this same band curved deeply on both edges is correspondingly graceful on the stout, large foot.

FOLLIES OF FASHION

Bicorne Hat Accents Angularity of Jaws

By Marguerite Barnes

ODDLY shaped little hats are all the rage these days, and they are ultra-smart when worn by the right type. The bicorne is one of the most frequently seen, and it is charming with a heart-shaped or oval face. Worn by the square-faced woman at the upper right, however, it is anything but attractive as it accents the angularity of her jaws. The rather flat line of both the hair and the hat across the forehead, the tight coiffure at the sides and the horizontal line of the scarf add to the general squareness of this type of face.

A much better choice for this woman is the tricorne at lower left, with the points strategically placed—one just below the cheek-bone and one well below the line of the jaw. A higher forehead line, and hair pulled out and downward, will make her lose that square-jawed look and give her a much more youthful appearance.

When You Do Pressing

IT isn't always convenient or even advisable to send one's clothes out to be pressed, neither is it an easy matter to do them one's self satisfactorily, but here are a few hints that may help in case of emergency.

To begin with, whatever the material of your garment, use only a moderately hot iron, particularly if the material is velvet or worsted. Whenever possible, that is, whenever the material will not be injured by dampening it, do this preferably by rolling, and always slip a dress or a skirt over the board. Never attempt to do it, as some do, by slipping a newspaper between its sides.

With cotton, linen or silk any amount of pressure may be used on the iron, but with wool or velvet or with any material having a nap, the pressing is done by lifting the iron along the surface. Press all seams and darts first, and press the darts upward, first dampening with a cloth wrung out in cold water.

To press seams in velvet or velveteen it is better to turn a hot flat-iron up and cover the flat surface with a wet cloth, then run the seam lightly over it, not allowing the velvet to become wet from the steam. In a flat pile velvet frock or coat the seams are pressed as with a wool one, except that the iron must be moved in the direction of the nap, not away from it.

Sleeves are the most difficult parts of any garment to press. Put the sleeve over a sleeveboard or over the smaller end of the ironing board, if you can, doing this preferably before slipping the dress over to be done. Dampen the seam and press lightly but well with an outward movement of the iron. Then dampen with a cloth well wrung out, any wrinkle that may appear around the armside and press until the seam is absolutely smooth and even.

As for the rest of the garment, after the sleeves press the collar or neckline, then the inside and outside skirt hem, and finally the broad uncomplicated portions of the garment.

In pressing hems, hold the hem firmly with the left hand, even pulling a bit toward you, this not only to keep the hem the same flatness all the way along, but to insure the threads running parallel with those over which it is laid as far as this is possible. Pressing hems is not, by any means, so simple a matter as it appears off hand, for in many garments the hems are carelessly made and in such cases it is always difficult to press them nicely. If they look all right on one side, it frequently happens they wrinkle or rough up on the other. Then there is nothing to do but to dampen the whole hem over and try again.

In pressing any wool goods remember that the steam actually does the smoothing out, while with cottons or linens it is the iron that accomplishes results, so never try to press out wrinkles in these materials without a thorough dampening, and usually it will be found necessary, at any rate advisable, to sprinkle the material thoroughly, roll up tightly and allow to remain for an hour or so before pressing.

The Beauty Shop

By Frances Olivier

Copyright Press Publishing Company (New York World) 1930

IT SEEMS we prophesied all wrong about the fad of scarlet fingernails. The fad fast grows into a rage, with conservative beauty establishments and conservative patrons being swept along on the tide. Little does the Spanish lady who tips her fingers with carmine on fete days or the Nautch dancer of far-off India who hennas her toenails and fingernails—little do these sisters of ours know what they have started!

FRANCES OLIVIER

But there is one thing the Beauty Shop thinks you would like to know. And that is the private feelings of the average American man toward this vogue for Lady Macbeth hands. We have gotten some very interesting reactions—and without sending out any questionnaires either.

One smart man of the world confessed that dining with a lady with vermilion fingernails took the edge off his appetite. Another was overheard to pay his beautiful theater companion the doubtful compliment of telling her her hands were quite beautiful in spite of their murderous decoration." And a third gentleman known for his opinions in the world of art humbly asked this department "why they do it," referring to the red nail craze.

It was explained to him that, first, certain women did it to be different and then the rest of them did it because some one else was doing it. Beauty, charm, had not a thing to do with the fad. And that to us seems a very great mistake indeed.

To our old-fashioned way of reasoning, the sole excuse for employing any form of bodily decoration is to add to the sum of one's attractiveness, to bring out one's good points, sort of flatter one's self, you understand. To be sure there are exotic breeds of lady who manage to look "interesting" by wearing a Paris green wig, with face powder and fingernails to match. But not all women have the exoticism or the sheer daring or the air necessary to getting away with such a toilette.

Moreover, if you will analyze these exotic ladies, you are quite likely to discover they have so few natural charms to emphasize that they must do something totally mad to set themselves off. Awful is the fear of being average, commonplace. And men share that fear with women—though it's a rare male who will confess to it.

Going back to the present fad in fingernails, it looks to us to be doubly doomed by the fact that it is not intrinsically becoming and daily growing more commonplace. A helpful hint to farsighted cosmeticians, several of whom are gradually introducing or reviving delicate pink tones to accent our darling fingers.

Housework for Nerves

SOME years ago an English priest startled the society women of London by advising them to go in for housework for tired nerves instead of spending time and money on costly rest cures.

Presumably the priest himself had no idea how eminently sane and sensible his advice was. With kitchens sanitary and equipped with conveniences, as even the least pretentious of modern kitchens are, with domestic science classes open to everyone, and radio pouring out helpful hints on all phases of housekeeping to all who will listen in, home work and house tasks should be quite as interesting and as beneficial an experience as a sojourn at the flossiest sanitarium.

It isn't necessary, and certainly it isn't beneficial, to be a martyr about it, to go about the work with the resigned air of one who knows that woman must weep and that her work is never done. Better muster up a cheerful attitude, even if it's a spurious one at first.

Plan the work carefully, like a general laying out a little campaign. Open the windows and let in all the fresh air there is. Breathe deeply and rhythmically. Loosen up the muscles, straighten out the face. Keep a smile on the lips and a song in the heart, preferably one with a good swing to it—a lilting waltz or a march—and watch the tasks almost do themselves, while the desire for the dubious delights of the sanitarium vanish into nothingness.

The Housewife Should Know

The mayonnaise is not so liable to curdle if the salt, pepper, mustard and vinegar or lemon juice are added to the beaten egg yolks before the oil is added.

If powdered sugar is used in making a meringue it will not be watery and a pinch of baking powder will also be a help.

TELLING THE WORLD

By Neal O'Hara

BIG PRIZE CONTEST!

TODAY is the day! It inaugurates the Daily Howitzer's $100,000 prize contest that the whole nation has been talking about. YOU are ELIGIBLE to COMPETE! Don't miss it!

In order to do something worth while, the editors and stockholders of the Daily Howitzer have decided to give its readers a series of Brain Stimulators. You will be required to THINK! But the prizes will be well worth the effort, even if it almost kills you.

The first great contest in the series is guessing the names of the twelve months. Can you think of anything more fascinating than that? We couldn't. It's a chance for your ingenuity and talent—and every month counts!

* * *

Below you will find twelve blank spaces where you write the months in. Hints are given which will stimulate the mind and make you think clear.

For instance, take No. 1 (——) as a sample. On the puzzle blank No. 1 is described as the first month of the year. If you don't know what the first month of the year is don't be at all discouraged. You still have a wonderful chance. By reading further you get the hint that No. 1 (——) has thirty-one days and ends just before Feb. 1. The final descriptive clip is that it begins with a "J" and ends with "uary."

Now, after you have marshaled all these facts and turned them over in your mind, the correct answer gradually dawns on you. Maybe. When you think you have the right solution mark on the blank what month you think it is and pass on to No. 2.

The month described above is January. Now that you have a head start, go on with this stimulating contest.

* * *

No. 2 (——). Second month of the year. Contains twenty-eight days and sometimes twenty-nine; also Washington's and Lincoln's birthdays. Begins with "F."

No. 3 (——) Seventh month of the year. The Fourth of July falls in this month. Hot spells are frequent.

No. 4. (——) Tenth month of the year, in which straw hats are rarely worn. Begins with "O."

No. 5 (——) Fourth month of the year. On the first day of this month, people often say, "April Fool!" This month is also noted for April showers and second deposits on motor cars.

No. 6 (——) Twelfth month of the year. Begins with a "D" and contains a holiday known as Xmas.

No. 7 (——) Eighth month of the year. A great vacation month beginning with "A"—and we don't mean April.

No. 8 (——) Third month of the year. Comes in like a lion and goes out like a lamb, with St. Patrick's Day in between.

No. 9 (——) Sixth month of the year. Rhymes with "spoon" and is famous for roses and brides.

No. 10 (——) Ninth month of the year. The month when colleges and oysters are opened. Has thirty days.

No. 11 (——) Fifth month of the year. Contains three letters. The abbreviation for this month is "May."

* * *

Now go to it! Here's a chance to make your brains function 100 per cent. Don't be discouraged if you can't solve these Brain Stimulators right off the bat. We purposely made them difficult to keep the riff-raff out.

To aid you in getting the right answers the encyclopedia, dictionary, Peruna Almanac, calendar, copper coils, yeast cakes, nitro-glycerine and oxy-acetylene torches may be used.

The first prize is $50,000 cash. If a movie scenario is made from the right answer another $25,000 will be added. Second prize is a peck of potatoes (cash value $15,000) and third prize is a Rolls-Royce truck. The next 30,000 prizes are tickets for overtime parking, each with a cash value of $5 or ten days in jail.

Another smashing contest next week. Watch for it!

THIS AND THAT

Tons of water were brought from Cape Cod for New York's Aquarium fishes to swim in. New York uses its own water for making gin.

That Middle Western drought is broken—which just puts it even with the farmers.

They are going to start running the German Government with a coalition. But they'll get around to oil heating before the winter is over.

The Wild Life Association is trying to raise a $10,000,000 fund. That'll only buy them a couple of cases of ginger ale in a night club.

When you figure the expansion in lipsticks and chain stores, the red paint industry must be doing pretty well.

Gandhi will resume his civil disobedience campaign in India—News item.

Well, all he needs is to put up red and green traffic lights to resume it.

Work has finally begun on Boulder Dam—which means the Republican spellbinders will start irrigating our ears.

For the Home Mechanic

BOILING water one may have at any time on an auto trip with the aid of the camp stove, and eggs are procurable somewhere on the route; consequently, coddled eggs should be a common outing diet, as no doubt they would be were it not that people never think of them. Besides, no provision is seriously made by tourists for preparing this dainty breakfast or lunch food. It is a little more difficult to cook eggs to the proper turn in the open than in the closed kitchen because of the more rapid cooling of the water. This is due to the nature of the egg-holders commonly employed.

To cook an egg thoroughly by merely pouring boiling water over it, the egg must be held in a position where the water can circulate all around it and where the water is uniformly hot. If the holder prevents this or is so heavy that it absorbs too much heat and thereby cools the water the result is not altogether satisfying—particularly in the open. It is necessary under these conditions to make an egg-holder that is shaped properly as well as light in bulk and weight.

We give two simple holders in our illustrations. One is of wire, to hang over the edge of the container—such as a pan or even a teacup; the other, of thin aluminum in the shape of two six-inch disks held apart by four thin strips of the same metal, all of which are riveted to the disks as shown. The top disk is perforated with one inch and five-eighths holes for the support of four eggs.

By placing a cover on the container the water will not cool as quickly as when the pan is uncovered and it is possible to have "three-minute eggs" or the full five-minute eggs.

For Excessive Perspiration

MANY a handsome dress has been ruined by excessive perspiration. This is quite unnecessary, as there are excellent preparations on the market to stop this annoyance.

Sometimes merely applying a dusting powder will give relief. There are reliable commercial products in dusting powder, but a good homemade powder is made by mixing one ounce boric acid with from ten to twenty grains of salicylic acid, which may be used freely.

If perspiration is very profuse, the parts must be washed daily and a lotion of two or more teaspoonfuls of powdered alum to a pint of water should be applied twice a day. This should be followed by the use of the dusting powder.

Perspiration odor has been eradicated by simply washing the affected parts with warm water containing compound spirits of ammonia. Two tablespoonfuls of the spirits to an ordinary basin of water should be used.

School nurse says all girls should know this

TALKING to a roomful of high school girls on personal hygiene, an experienced district nurse said: "One of the basic rules of health for girls is to keep the system functioning naturally at all times. Normal exercise and diet habits should be encouraged. But when necessary there's no harm in taking nujol, since it works mechanically and can't disturb the normal functions of any organ of the body. Particularly with girls, there are times when nujol should always be taken. Take a spoonful every night for a few days. It's a thoroughly safe and harmless method. It won't cause distress or gas pains or griping."
Nujol is different from any other substance. It contains no drugs or medicine. It can be taken safely no matter how you are feeling because it is so pure and harmless, and works so easily. Every woman should keep a bottle on hand. Every druggist has this remarkable substance. Get the genuine.

DID YOU CALL ME LIEUTENANT ??
YES- IS THIS MAN TELLING THE TRUTH IS YOUR NAME LOOY?
NO SIR- NOT ME MY NAME'S MALCOLM!!

COUNCIL OF EL CERRITO MEETS

The council of El Cerrito at its meeting Monday night instructed Superintendent of Streets R. R. Cheek to have culverts installed at Barrett avenue and Edward street and at Edward street and Poinsett avenue in the Mira Vista district.

The work which was ordered on the recommendation of Street Commissioner Peter Larsen, is to cost less than $500.

A request for an ordinance regulating the keeping of poultry in El Cerrito was presented to the council in form of a petition containing 219 names, was laid over for two weeks.

The petition asked that not over fifty of any kind of poultry be kept within 500 feet of any dwelling unless already operating. If those operating now cease for 180 days that they comply with the ordinance if started again.

No action was taken as the council is contemplating the passing of a zoning ordinance which would regulate poultry.

Communication notifying the council of the meeting of the League of California Municipalities in Long Beach from October 6 to October 11 was placed on file.

An offer of an Oakland firm to sell the city a new siren for $92.50 and give them $52.50 for the old siren was referred to Fire Commissioner Hans M. Nissen for one week.

Complaint of J. Hermann, San Pablo avenue near Cutting boulevard that the sign of Betsy Kitchen cut off the view of his sign and that it was on the sidewalk area should be removed was referred to the council as a whole by Mayor J. R. Beck.

Bids from the Gilmore Oil company and Shell Oil company for supplying the city with gasoline, oil and kerosene was laid over for one week.

Fred Begero was awarded a contract for furnishing six ash cans to the city for $45. Three cans are to be located on San Pablo avenue in both north and south end of El Cerrito.

Dot Mackaye Not To Visit Quentin

SAN FRANCISCO, Sept. 29.—UP—Dorothy Mackaye, actress who served a term in San Quentin state prison on a charge of concealing evidence when her husband, Ray Raymond, died after a fist fight with Paul Kelly, former juvenile star in motion pictures, returned here today.

Miss Mackaye, who first gained recognition as an actress in this city, will seek to regain the aplause when she opens a new play here next week.

"I won't go across the bay to the big house (San Quentin), even though I'd like to," Miss Mackaye said. "One of the rules at San Quentin is that when you have served time, you can't go back."

EL CERRITO LEGION TO SEAT HEADS

Officers for the Louis Hagen post of the American Legion at El Cerrito will be installed tonight.

Mrs. Lelah Baker, president of this district of the Legion auxiliary will install the Auxiliary officers.

C. W. W. St. John, vice commander of this district of the Legion will install the Legion officers.

CANNON MUM ON NEW CHARGES

NEW YORK, Sept. 29.—Dr. James Cannon, Jr., bishop of the Methodist Episcopal church, South returned today from Brazil, aboard the Munson liner American Legion, to face a new series of charges filed by four elders of his church.

There was about the prelate an air of pale weariness, ts though he had long been ill, but when in conversation with newspapermen he discoreded on prohibition his mannner changed abruptly. His eyes flashed fire and he suddenly became energized.

He would—and did—talk lengthily concerning various aspects of the wet and dry situation. He denounced Roman Catholics as being almost unanimously opposed to prohibition. But he declined to comment on the fresh indictment that has been drawn against him and neither would he answer questions concerning his bride of two months, the former Mrs. Helen McCallum whom he married in London before proceeding to South America.

Bishop Mum

Regarding the charges, which are said not only to relate to speculative and political activities but to concern matters of private conduct, Bishop Cannon said:

"If I made a statement now it would be grossly unfair to the people who have brought the charges, to me and to the public. I must get to my office in Washington, read my mail and become acquainted with developments before I make any comment."

He pointed out that the general conference of his church, meeting recently at Dallas, had exonerated him of any wrong-doing in connection with charges then filed against him. There was a certain element, he said, "persecuting" him. Further he would not go before learning new details of the charges, he added.

Tells Of Work

Someone then asked him about his prohibition work in Brazil.

"The situation there is very optimistic," he said. "I made several speeches and was well received."

Urged to comment on the political situation in New York state, especially in regard to the fact that the Republican party last week adopted a wet stand, he said that it represented "sailing before prevailing local winds." Any politician in wet New York or New Jersey, he said, would have to declare himself wet to be elected.

Scores Tammany

"You know what the Tammany situation has made of New York City," he went on. "I am sorry to say the Tammany element is the foreign element.

"About Tammany let's be frank. The Roman Catholic element is organized in its opposition to prohibition. Even Archbishops, Cardinals and the Pope are all against prohibition. All members of the church, with a few exceptions, are aligned against it."

GILROY—Emmett La Tourette secured five-year lease on garage buildings at southeast corner of Sixth and Monterey streets.

Sills Estate Value $250,000

LOS ANGELES, Sept. 29.—UP—Property valued at $250,000 was left by Milton Sills, screen star, who died recently of heart attack, it was learned today when his will was filed for probate.

His widow, Doris Kenyon, actress, was named sole beneficiary, except for minor bequests. Kenyon Sills, their young son, was bequeathed the actor's watch and ring. His daughter by a first marriage, Dorothy, 18, was given a diamond ring. Sills asked that a $300,000 trust fund he had created for his first wife, Gladys Sills, and another of $100,000 for Dorothy be maintained at those figures. He did not indicate where the funds should be obtained.

Later in the day, the will of Lon Chaney, character actor, was admitted to probate.

The bulk of the $550,000 estate was bequeathed to his widow, Mrs. Hazel G. Chaney. One dollar was given to his former wife, Cleva Creighton Bush. Chaney's personal servant, John Jeske, was bequeathed $5,000. The actor said life insurance policies provided for his son, Creighton Tull Chaney, and for a brother, John, and a sister, Carrie Keyes.

Westside Club Has Session

A meeting of the Westside Improvement club was held in the Washington school last night, during which business affecting the progress of teh group was discussed.

O. D. Baker, Oakland realtor, was the speaker of the evening, and lauded the activities of the local club. He also declared his company is interested in developing that section of the city and promised to have a prominent speaker from Los Angeles address the meeting on Oct. 27.

Man Held On Game Charges

Bail has been set at $50 for L M. Rassmussen, 2056 Eighty-fourth street, Oakland, who was arrested by Game Warden J. L. Bundock on a charge of violation of the fish and game laws.

Bundock alleges that Rasmussen claimed that he was a citizen of the United States when he received his angling license at citizen's rates. An investigation revealed he was not a citizen, Bundock declared.

BOND APPROVED

The plasterers bond of L. G. Slusser was approved by the city council at its meeting last evening.

Ford Activities Stimulates Selling of Central Business Property

Richmond Calif: The building of the huge Ford plant and many other activities in Richmond are creating a big demand for centrally located Richmond Real Estate.

The wise ones are buying in the Burg Tracts—the heart of Richmond's new Business Center, where values must rise first, making big profits certain.

Here is food for thought, investigation and action.

"What you will be tomorrow, depends upon what you do today."

Big profits from real estate investments depends upon the location of the property.

Buy in the Burg Tracts, and be sure of both location and profit.

Lots with all improvements in and completed only $500, up.

Anniversary Of Pacific Discovery

Four hundred and seventen years ago yesterday, Vasco Nunez de Balboa, with but 25 men remaining from his starting number of 190, wearily climbed what apparently was only another mountain, and gazed out over the broad blue expanse of what he named the Pacific ocean.

This bit of information was issued yesterday by Everett Cohen, chairman of the Richmond Post of the American Legion Americanization committee, who is announcing for the benefit of the public, all historic dates.

The Pacific ocean was discovered by Balboa Sept. 29, 1513, just 29 days after he and his 190 men left San Domingo, an island in the Antlantic ocean.

Hardships and frequent battles with hostile Indians reduced his little force to but 24 men, but pushing on valiently, Balboa finally came to the Pacific coast.

Sept. 29 had been set aside as San Miguel's day, and in honor of the saint, Balboa named the gulf in the southern part of the continent, over which he gazed at the Gulf of San Miguel.

Berkeley Area Threatened By Gas

BERKELEY, Sept. 29. —UP—Danger of explosion and fire threatened an area of 50 square blocks in the north Cragmont district of Berkeley today when a leak in a gas main filed the air with illuminating gas fumes. Fire men patrolled the district while utility company employes sought the leak.

New Gas War In El Cerrito As Prices Fall

(Continued from Page 1

ing at 21 cents, are now being sold at 20 cents, the operator declaring he had cut his prices yesterday morning.

Prices Raised

Hancock gasoline is being sold at 18 cents. This station is the only one along San Pablo avenue in El Cerrito that is displaying a cut rate sign.

Cause of the flurry in gas prices over the week-end, is unknown.

With the start of the El Cerrito gas war over the past week-end many of the operators are predicting that the major companies will again attempt to regulate prices.

The last gas war in California, which raged throughout the state for some time, cost service station operators in the state more than $3,000,000 according to estimates by company experts.

24 Cats Found In Woman's Room

SAN FRANCISCO, Sept. 29.—UP—Loud and shrill "meowings" at all hours of the day and night caused lodgers in a local apartment house to ask Charles Zukor, owner of the building to investigate. He did, and found 24 cats living in the apartment of Mrs. Margaret Brown. Health department officials obtained a warrant for the woman's arrest.

ON VISIT

Mr. and Mrs. Samuel Bagley of Garvin avenue are enjoying a several day's visit with friends in Sonoma county.

CONCLAVE OF C. E. GROUPS IS ENDED

At the closing session of the Contra Costa county Christian Endeavor society meeting in Richmond Sunday, John Ball of Crockett was named president of the group.

Other officers named were: William Quandt of Walnut Creek, vice-president; Miss Evelyn Bengston, Richmond, secretary; Harry Clough, Martinez, treasurer; Miss Mabel Beach, Richmond, intermediate superintendent; Mrs. E. J. Hebard, Richmond junior superintendent; John Baldwin, associate intermediate superintendent; Mrs. Harry Clough, Martinez, associate junior superintendent; Miss Evelean Hebrard, Richmond, music superintendent. Others from Richmond elected to office were Walter Thomas, Gordon Lemon, Miss Sadie Gasser, Mrs. Ellen Smith. Fred Ernest of Martinez the retiring president was also elected to an office.

The banner for the largest aetendance was awarded to the Stege Presbyterian church while the Christian Church Intermediate society won an efficiency and attendance banner.

More than 35 "Life Recruits" were honored at a banquet in the Hotel Carquinez yesterday.

Prof. L. H. Bennett, of Berkeley, brother of Rev. Primus Bennett was the principal speaker at the closing session. His topic was "Triumphant Conquerers."

RECORD-HERALD PROTECTS YOUR INTERESTS—TAKE IT

Class Will Open Today At School

The class in millinery and dressmaking conducted under the auspices of the Parent-Teacher's council and the Richmond public schools will open this morning in the Grant school and will continue throughout the school semester.

A large class is expected to register today and the classes will be held every Tuesday free of charge. There will be only a small registration fee.

The session will last all day and many of the women attending, plan to bring their lunch and prepare a hot drink at the school where cooking facilities are provided.

Members of the P. T. A. council will be at the school from 9 till 12 this morning to register the women signing for the course.

Mrs. Eleanore Anderson has been selected as the instructor for the dressmaking and millinery classes.

Woman Injured In Train Crash

SAN FRANCISCO, Sept. 29.—UP—One woman was hurt slightly here today when a Western Pacific switch engine collided with a street car near 8th and Bryant streets. The motorman of the street car had increased his speed when he saw the freight engine approaching and the engine only struck the rear of the car, avoiding a more serious accident.

Folsom Prisoner Stabbed In Row

FOLSON PRISON, Sept. 29.—UP—Stabbed by an unknown convict, Tony de Julio, prisoner sent here from San Francisco, was in a critical condition tonight. De Julio was returning to his cell from lunch when he was attacked. Guards began a search of prisoners who were near him at the time but could not locate the assailant.

BANDIT ROBS MARTINEZ THEATER

MARTINEZ, Sept. 29.—Police of this district are today searching for the lone holdup man who last night forced John Shaw, manager of the State Theater, to open the safe, tied him up and then escaped with $1277.

The holdup occurred at 10:15 o'clock, when a score of patrons were in the theater, unmindful of what was occurring.

It is believed that the bandit may have an accomplice as a theater man said he noticed the bandit leave the show and that he was closely followed by a second man.

When Miss Anna Swift, cashier, walked into the manager's office at 10:10 with a sack of money, she saw a man seated on a lounge outside of the office. When she left, the man was gone.

After Miss Swift's departure, the robber, unmasked opened the office door covered Shaw with a revolver and warned him to keep quiet.

He then forced Shaw to open the safe and took the money. He then forced Shaw to lie upon the floor, while he bound and gagged him.
